**SPECIAL NOTICE.**—Any Seeds not enumerated in this Catalogue we will be pleased to procure for our patrons.

For 1907.

If you have no use for this Catalogue we should esteem it a favour if you would pass it on to any of your friends who are likely to require SEEDS, GARDEN SUNDRIES, &c., at the same time kindly recommending us to their notice.

#### BUSINESS NOTICES.

EARLY ORDERS.—As the Seed Season is necessarily a short one, we shall feel obliged by our Customers sending in their orders as soon as possible after receiving our Catalogue.

ORDER SHEET.—It will expedite the despatch of orders if our patrons will make use of the accompanying order sheet, and particular attention is requested to have the name and address inserted, to prevent disappointment and delay.

CATALOGUES.—Customers will greatly oblige if they will send us a Post Card when our Catalogues do not arrive at the usual periods, as sometimes they are lost in the post and do not reach their destination. We shall also be glad to be informed of any change of address, so that Catalogues may be sent regularly.

FREE CARRIAGE. — All Vegetable Seeds and Flower Seeds are delivered free, Potatoes, Mishroom Spawn, &c., are delivered free, either alone or as part of a general order when the total amount is not less than 20/- value.

TERMS OF PAYMENT.—Accounts due Quarterly and Half-yearly, strictly net; 5 per cent. discount allowed off Seeds and Bulbs, and 2½ per cent. off Plants, Trees, &c., for cash with order or on receipt of Goods. Cut Flowers, Wreaths, Bouquets, &c., are all sold for prompt cash and no discount. Postal and Money Orders to be made payable at Altrincham. Small amounts may be remitted in Penny Stamps, but no receipt will be sent for sums of 2/6 and under unless Stamp is enclosed to cover postage.

**NOVELTIES.**—We are always open to purchase plants or seeds, upon proof of quality, or anything new and choice, and shall be pleased to hear from patrons possessing them.

OCCASIONAL CUSTOMERS. — In cases of small orders, customers are respectfully requested to send remittances in prepayment.

RETURNED PACKAGES. — Boxes, Hampers, &c., which have been forwarded with Seeds, will be allowed full price for when returned carriage paid. They should be addressed to 185, WATER ST., MANCHESTER; name and address of sender must be on the address label, and a Post Card should also be sent advising us of their despatch.

HOME GROWN SEEDS.—Some firms profess that all the Seeds they sell are grown at home; sensible people will, however, doubt the veracity of such statements; but we do say that all the Seeds we sell are PURE and RELIABLE, and selected with the greatest possible care, no effort being spared to have the best of everything, and we thoroughly test the germinating powers of all Seeds before they are sent out. Our strains of Primula, Celosia, Cineraria, Caleolaria, Cyclamen, Begonia, and other florists' flowers have a wide reputation, and Seeds of these are carefully selected in our Nurseries from picked plants.

EXPORT ORDERS. — Seeds, Bulbs, &c., specially selected for exportation to all parts, and carefully and securely packed in air-tight cases. Plants packed in Wardian cases, &c.

**NON-WARRANTY.**—CLIBRANS send out only Seeds that will, to the best of their belief, give entire satisfaction; it must, however, be expressly understood that they warrant neither description, growth, nor productiveness of any Seeds they sell, nor will they hold themselves in any way responsible for the crop. CLIBRANS will take it for granted that all who order from them do so with a full knowledge of the preceding.

# CLIBRANS' POPULAR COLLECTIONS

OF CAREFULLY SELECTED

# VEGETABLE SEEDS.

#### YEAR'S SUPPLY IN ONE THE GARDEN.

Post Free or Carriage Paid to Nearest Railway Station.

THESE collections are selected with the greatest possible care (and are not, as is frequently the case, made the medium of working off unsaleable stocks), to give a succession of the best varieties of the different vegetables throughout the year; they contain only seeds of recognised merit, proportioned to suit large or small gardens, all equally choice in quality. Amateurs will find them a ready medium of securing a years' supply with the minimum of trouble.

To the GUINEA collection we draw your especial attention, as it is framed with a view to meeting the keenest competition. It will be found to furnish a really good supply of high-class vegetables, and should be enough for a fair-sized garden.

Prices, £3 8s.; £2 2s.; £1 11s. 6d.; £1 1s.; and 10s. 6d.

# CLIBRANS' TESTED VEGETABLE SEEDS.

The following selections include the best and most distinct varieties in each section—those of doubtful quality, and repetitions of the same sorts under different names, having been excluded.

# Garden Peas

(Pisum sativum.)

Any good, well-drained, deeply worked soil is suitable for peas, but a rich deep loam with plenty of calcareous matter is best. Farmyard manure should, as a rule, be given to the previous crop. It the soil be heavy, quicklime should be applied at the rate of 11 to 2 lbs., to the square yard the previous Autumn. On a light soil 2 ozs. of Clibrans' Potash Manure should be applied to the square yard some days before the peas are sown, and in every case the soil should receive a top-dressing of Clibrans' Phosphate Manure at the rate of 3 ozs, to the square yard just after the peas are put in. The peas are usually sown in drills 2 to 23 inches deep in light soils while on heavy land they should be sown almost on the surface and I to 11 inches of soil drawn over them. Half an inch of sand or sifted cinder ashes at the bottom of the drill row will be found of great advantage in clay soil. They should be kept clean from weeds and earthed up twice during their growth. For an early crop a sowing of the Earliest varieties may be made in January. Sowing of Early and Second Early varieties may be made in February, and the main crops in succession from March to the end of May.

The heights given are those obtained in an ordinary season under normal conditions, but they will be influenced according to the dryness or otherwise of the season and the nature of the soil.

The Wrinkled Varieties are marked with an asterisk (\*).

# 10 & 12 Market Street, MANCHESTER; & ALTRINCHAM.

The Gardens, Shorbridge Hall, Warkworth.

"I have much pleasure in again sending you my seed order, &c., and at the same time allow me to express my satisfaction with the material supplied by your firm previously. The seeds I have had from you formerly have been very good, and their germinating qualities splendid."—Yours sincerely,

D. MACKIE.

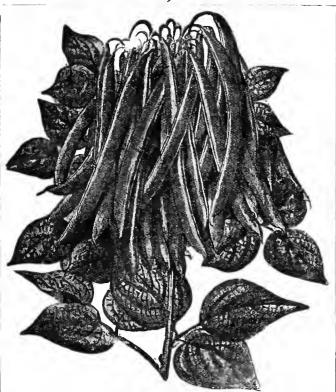

#### Beans, Broad, (Faba vulgaris).

Sow at intervals, from January to May, in rows 2 feet apart, a strong, stiff, rich soil being the most suitable. As soon as the young pods show through the flowers at the bottom of the plants the tops ought to be pinched out to throw all energy into the flowers already formed. Beans as a rule, require phosphate food; 1½ ozs. Clibrans' Phosphate Manure to the square yard is an effective dressing.

Per qt.—s	. (	d.

# Beans, French or Kidney (Phaseolius vulgaris).

WOOD'S CENTENARY GOLDEN PODDED DWARF FRENCH BEAN.

Sow in drills 18 inches or 2 feet apart, the poorer the soil the closer the rows may be planted. Place the seeds 2 inches deep with the eye downward and 6 inches apart. A succession of sowings may be made from the end of April to July. A dressing of equal parts of Clibrans' Phosphate Manure and Clibrans' Potash Manure at the rate of 2 ozs. to the square yard will cause this crop to become much more productive.

Per qt.	—s.	d.
Canadlan Wonder, exceedingly prolific, fine for exhibition, and one of the best for main crop		3
Cream-coloured, or Pale Dun. early, heavy cropper	o	10

# Beans, Runner (Phaseolus multiflorus).

Runner Beans succeed best in sandy loam liberally enriched with short manure. Sow in drills from May to July, 3 or 4 feet apart, placing the seeds with the eye downward, 2 inches deep and 6 inches apart in the rows; pinch off the tops when the plants are in full flower. The same dressing should be used as is recommended for French Beans, at the rate of 3 ozs. to the square yard.

CLIBRANS' BLACK BEET.

#### Artichoke (Cynaria scolyomus.)

Globe Artichokes sown in February or March, on a nearly spent hot bed, can be planted out in May, and will probably give some return the same Autumn. When sown in April or May they will not bear till the following year. The land should be carefully dug over and well manured. The addition of 2 ozs. of Clibrans' Nitrogen Manure and 1 oz. of Clibrans' Potash Manure to each square yard of the permanent bed will be found to have most beneficial action. For Artichoke Plants and Tubers, see page, 21.

								Per pa	ack	et.
Green Globe, heads large, very t	thick and	l fleshy	• • •	•••	•••	• • •	•••	 6d. &	I	0
Large Purple, large oval heads	•••	•••		• • •		• • •		 6d. &	I	0

#### Asparagus (Asparagus officinalis).

Sow in March and April, then in the following Spring transplant into beds prepared by trenclung the ground 3 feet deep, and mixing about 12 inches thick of well-rotted manure audia good proportion of broken bones and salt with the soil. In Winter give protection. The permanent beds should receive a dressing every Spring of two parts of Clibrans' Nitrogen Manure, one part of Clibrans' Phosphate Manure, and one part of Clibrans' Potash Manure, mixed together and applied at the rate of 1 lb. to the square yard. For Asparagus Roots, see page, 21. [Per lb. Per oz.]

#### Beet-Garden (Beta Vulgaris).

Sow in May in drills 12 to 18 inches apart, and 1 inch deep, on light soil that has been enriched by previous treatment. When the plants have made three or four leaves they should be thinned out to 9 inches apart. The Beet as a plant requires abundance of potash and phosphate: —1½ ozs. of Clibrans' Potash Mannre and 2 ozs. Clibrans' Phosphate Manure to the square yard will be found sufficient. These manures are best applied a few days before the seed is sown and carefully raked in.

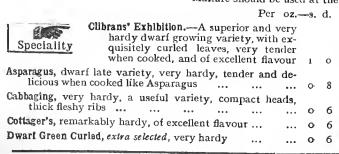

Clibrans' Black.—We have great pleasure in strongly recommending this excellent Beet; it is, beyond doubt, the finest of all, and its exceptional merits must secure for it a place in the front rank. The roots are finely formed, almost black in colour, and of delicate flavour; as an exhibition variety it has no equal. Per packet, 1/-

Varlegated, invaluable for garnishing purposes. Per pkt., 6d.

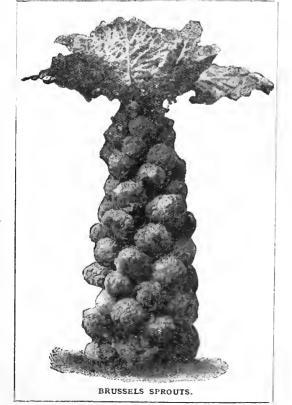

#### Broccoli. (Brassica oleracea botrytis asparagoides.)

Requires a heavy, deep, rich soil, and liquid manure during growth. Seed should be sown in March, and as soon as the plants are large enough they should be planted out about 2 feet apart. The ground should be kept clear of weeds, and the plants earthed up as they advance in growth. Some of the late kinds if sown in August and planted out in March will produce immense heads in the following Spring. Protect the late kinds from frost with straw litter. For this crop the same special manures should be employed as for Cauliflower.

# CILBRANS' TENDER AND TRUE CABBAGE.

# Cabbage (Brassica oleracea capitata).

The principal sowing should be made about the end of July or the beginning of August, another about the middle of August, and again in March and April. As soon as the plants have made four or five leaves they should be planted out, from 15 to 24 inches apart (according to the kinds grown), on a well-manured out, and deeply trenched piece of ground; a liberal supply of liquid manure will be found beneficial during the growing season. Three ounces of Clibrans' Nitrogen Manure aud 1 oz. of Clibrans' Phosphate Manure to the square yard will perfectly answer all the requirements of this crop.

CLIBRANS' TENDER AND TRUE -This is without exception the best early Cabbage in cultivation, the flavour is most delicious, the hearts are firm and tender, and attain a remarkable weight. A splendid

#### Cardoon (Cynara cardunculus.)

Sow during April or May on a sunny border. Transplant early in June into well-manured trenches. The rows should be 4 feet apart and the plants 18 inches apart in the rows. In August or September earth up and blanch as celery. The mid-rib of the leaf is used in soups, salads, &c.

Large Spanish, the best for general use, ...

... per pkt. 6d. ; per oz. 9d.

ALTRINCHAM CARROT.

#### Carrot (Daucas carota.)

Requires a deep, rich sandy soil with a fair amount of phosphate food to grow them to perfection. The soil should be thoroughly trenched and should have 3 ozs. of Clibrans' Phosphate Manure applied to the square yard the previous Autumn. With very light soils the addition of 1 oz. of Clibrans' Potash Manure will also be advisable. For the main crop the seed should be sown in March, in rows 18 inches apart, and the plants should subsequently be thinned out to from 4 to 7 inches apart. For early use the French Horn may be sown on a hot-bed in January or February.

Per oz.—s. d.

Speciality Cl Speciality

St. Valery, desirable intermediate variety, of fine shape; flesh bright red, excellent quality, good cropper ... ... ... ... ... ... ... ...

#### Cauliflower (Brassica oleracea botrytis cauliflora.)

Sow the first and third weeks in August for Spring and Summer use, and from February to May for Autumn cutting. Those sown in August, should be pricked into a frame or under a handglass during the Winter, and in Spring planted out in rows 2 feet apart and 18 inches apart in the rows, in well manured and deeplytrenched ground. Apply 2 ozs. of Clibrans' Nitrogen Manure and 1½ ozs. of Clibrans' Phosphate Manure to the square yard.

Per oz.—s. d

# Celery (Apium Graveolens.)

Sow the seed very thinly in a slight hot-bed from February to April. The plants should be well hardened off, and may be planted out in rows from the end of April till the end of June. The rows should be 6 feet apart, and have from 6 to 12 inches of thoroughly decayed manure in them, and the plants 8 inches apart in the rows. Give abundance of water during the ground earth up as the plants advance in growth, taking care to keep the soil from the centre of the plants. Two ounces of Clibrans' Nitrogen Manure to the running yard will be found of considerable service.

CLIBRANS' PINK CELERY.

Per Packet, 6d. and 1/- excepting where otherwise priced.

#### RED VARIETIES.

Special

CLIBRANS' PINK.—This grand variety, after many years of careful selection, now stauds unrivalled, either for table use or exhibition.

It is large, solid, and of a delicate pink colour, very crisp

and brittle, flavour nutty, blanches almost white, and is of very rapid growth. Per packet, 1/—

CLIBRANS' RED.—This valuable variety still bolds the premier position. The stalks are revery solid, crisp, juicy, and of a fine nutty Special tlavour. Per pkt., 1/Lelcester Red, very crisp, and fine nutty flavour.

Major Clarke's Solid Red, crisp and solid, excellent flavour, keeps well, splendid for early use.

Standard Bearer, splendid red variety, compact habit. Grows to a heavy weight, and remains long in perfection.

wright's Grove Red, large and crisp, dwarf, finely flavoured.

Sulham Prize Pink, solid, crisp, fine walnut flavour.

Williams' Matchless Red, compact, strong growing variety; solid, crisp, juicy, and fine flavoured.

Wright's Grove Pink, a splendid bright, pink colour; sweet and crisp, delicately flavoured, medium size.

Wright's Grove Red, large and crisp, dwarf, finely flavoured.

#### WHITE VARIETIES.

CLIBRANS' WHITE.—The best white Celery ever offered. It grows to a large size, is very solid, crisp, and juicy, with a rich nutty flavour. As an exhibition variety it is unequalled. Per packet, 1/-

CLARK'S EARLY MARKET .- This new early variety is described by the raiser as the earliest and best market Celery yet sent out, being New

ready for use at least six weeks earlier than any other variety planted at the same time. It grows to a large size and is of sweet nutty flavour. Per packet, 1/Turner's Incomparable White, dwart, easily blanched.

White Plume, an excellent variety, requires very little blanching, large, solid heads, crisp, and good flavour.

Wright's Grove White, superior flavour, large and solid, medium size, excellent for early use, blanches well.

Wright's Giant White, heads very large, solid and crisp, with a fine nutty flavour.

Celeriac, or Turnip-rooted Celery.—The root makes a delicious salad when boiled like a turnip. The root and young leaves are valuable for flavouring soups, &c.
Celery Seed, for flavouring soups. Per ounce, 3d.; per lb., 1/6.

Mr. Peter Gregorn, Westhoughton, Bolton, writes Jan. 1st, 1904:—"I have grown Clibrans' Pink Celery for three years, and find it an excellent variety."

Chicory (Cichorum intybus).

Sow from April to June in rich soil, to which 2 ozs. of Clibrans' Nitrogen Manure has been added to the square yard, and afterwards thin out to about 6 inches apart. May be forced and cooked in the same manner as Sea Kale, ... ... per packet, 6d. | Without (Brussels Chicory), fine Winter Salad, Common per packet, 6d.

#### Corn Salad, or Lamb's Lettuce

(Valerianella olitoria).

Sow February to April for Auutmn use, and in August or September for Spring use Gather leaves as from Spinach. Broad Leaved

#### Cress (Lepidium sativum)

Sow at intervals of a week from March to September in open ground, and during the Winter months in frames.

Per oz.-s. d. American, or Land, a perennial variety; similar to water-cress in the foliage and flavour, excellent for salads ... 1 Australian, or Golden, large leaves, grows about 1 toot high, excellent for salads or garnishing Extra Curled, best for general use, fine for salads or garnishing; may be cut several times ... per quart, 1/9; per pint, 1/- 0 2
per quart, 1/9; per pint, 1/- 0 2 ... per packet, 6d.

#### Cucumber (Cucumis satixus.)

The seed may be sown from January to April for Summer use, and in August and September for Winter and Sping use. The temperature of the seed bed should range from 75 to 85 degrees; a rich, loamy soil suits them best. Experiment has shown that they require a large amount of nitrogen and phosphate manures. An excellent top dressing may be made by mixing four parts of Clibrans' Nitrogen Manure with five parts of

#### CLIBRANS' LORD DERBY.

Awarded first prize at York Gala, 1902, against 13 competitors; also first prize at Abbey Park, Leicester, 1903.

A very handsome scarlet-fleshed variety, oval shaped, beautifully netted. The flesh is very thick and grand flavour; it is a very free setter, and will come in at any time.

Per pkt. 1/Per pkt.—s. d.
Blenhelm Orange, handsome fruit;

16

splendid flavour ... ...

Delicious Canteloup, a very superior variety of hardy and robust constitution. It is very prolific, and bears handsome fruit of large size, which when ripe, is of beautiful golden colour, with bright orange-scarlet flesh, very thick,

and of exquisite quality... I

Munro's Little Heath, excellent flavour,
hardy and prolific ... I

Premier, a splendid Melon; flesh thick,
exquisite flavour ... I

#### GREEN & WHITE-FLESHED VARIETIES.

Best of All, a very early, whitefleshed, beautifully-netted variety of splendid quality ... ... Counters of Derby, strong grower, glo-

Counters of Derby, strong grower, globular in shape, and beautifully netted with very thin skin, delicious flavour

COUNTESS OF LATHOM,—This splendid new Melon is the result of a cross between Eastnor Castle and William Tillery. The flesh is green and of exceeding thickness, rind very thin, finely and evenly netted; a moderately strong grower and a very free setter, the fruits varying from 4 to 6 lbs. in weight, the flavour being delicions. Altogether this is without doubt one of the finest Melons of recent introduction. Per packet, 1/6.

Melons of recent introduction. Per packet, 1/6.
 The Earl's Favourite, a handsome variety, deep green flesh and rich flavour, fine straw colour, and well netted ...
 William Tillery, one of the finest Melons, green flesh of great

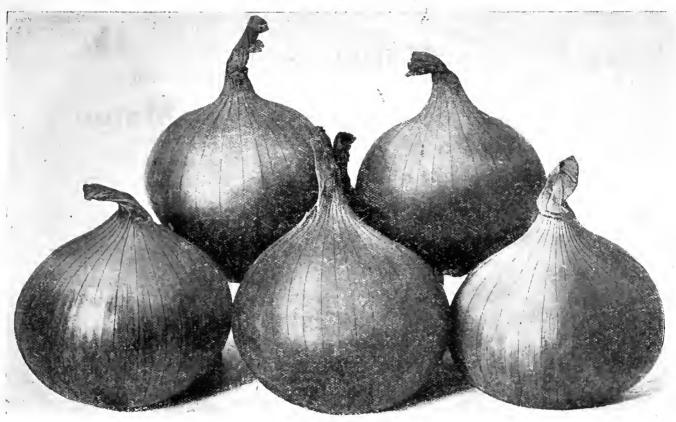

depth, juicy, and of delicious flavour; a free setter ... 1
Windsor Castle, splendid green-fleshed, large oval-shaped beautifully netted, flesh thick, flavour exquisite ... 1

#### Mustard (Sinapis alba).

#### Onion (Allium cepa).

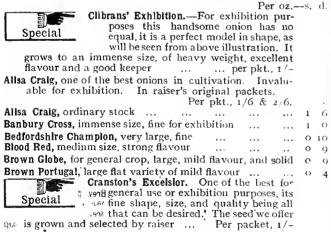

CLIBRANS'EXHIBITION ONION.

[From a Photo.]

Onions require a deep rich, heavy soil. Where the soil is not suitable, it should be heavily manured and deeply trenched the previous Autumn, and just before sowing made very firm. The seed should be sown early in March for Winter, and in August for Summer use. Thin out the plants to about six inches apart, and keep the surface free from weeds by hand-picking and frequent hoeing, taking care not to stir the soil too deeply or collect it about the growing bulbs. The Tripoli varieties attain a large size if transplanted in the Spring. As a top dressing for an onion bed, use Clibrans' Nitrogen Manure at the rate of 2 ozs. to the square yard.

#### Parsley (Carum Petroselinum).

Sow in March or April, in well-manured soil, and thin out to 9 inches apart. If fine exhibition plants are desired, re-transplant from 12 inches to 18 inches apart in about a month after the first transplanting.

Cllbrans.' A distinct and attractive variety of dwarf and compact growth. The leaves are of a beautiful bright green colour. It is very hardy and exquisitely curled, the perfection of a garnishing Parsley.

Myatt's Garnishing, very fine curled, splendid variety, fine for Summer Fern Leaved, a very superior and distinct dwarf variety, leaves beautifully

cut and very ornamental, finc for garnishing and table decoration ... Hamburg, or Turnlp-rooted, only cultivated for its fleshy roots, which are used for flavouring soups; or it may be cooked and served as parsnips ... ... ... ... ...

Parsnip  $(Pastinaca\ sativa).$ 

Prefers a deep, rich, sandy soil, thoroughly trenched and manured the previous Autumn. As they are among the phosphate-loving vegetables, a dressing of Clibrans' Phosphate Manure should be given a week before sowing at the rate of 3 ozs. to the square yard. For the main crop the seeds should be sown in March, in rows 18 inches apart, and the young plants thinned out to from 4 to 7 inches apart in the rows. in the rows. Per oz.—s. d.

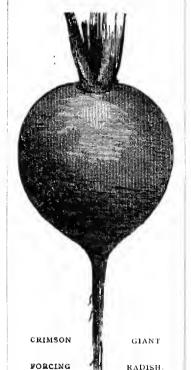

Cllbrans' Exhlbition, a handsome and de-licious flavoured variety, about 18 in. in length, flesh very light in colour, exceedingly firm and solid in texture,

fine for exhibition ...

Sow at intervals of a fortnight from February to September. For early use, a sowing may be made on a slight hot-bed in January. They require a light and rich loamy soil. Per lb. Per oz.

s. d. Clibrans' Scarlet Gem. Very distinct, turnip-shaped variety, of rich bright scarlet with white tip; flesh pure white, crisp, solid,

Speciality and of delicious flavour, very handsome, matures quickly, unsurpassed for very early forcing Black Spanish, hardy variety of fine flavour, distinct, for Antumn sowing French Breakfast, splendid oval-shaped variety, crisp, very mild and tender; scarlet tipped white, quick grower and distinct; one of the best for general crop Long White Naples, very hardy Winter variety ... ... ... ... ...

Scarlet Olive-shaped, mild, tender, and crisp, deep rich colour; good quality ... 2
Scarlet Short-top, long scarlet, early Summer variety, tender, crisp, and mild flavoured 2

Turnip, Crimson Glant Forcing. This is quite a new type of forcing Radish; of a deep crimson colour, and flesh pure white. It grows to a large size, but retains its firmness and crispness, and is also of the mildest flavour Speciality

mild and crisp; successional sowings should be made

#### Khubarb Seed (Rheum hibridum).

Sow in April on a warm sheltered border, and plant out in deep, well-trenched ground when plants are sufficiently strong. Mixed, per packet, 6d. For Rhubarb Roots, see page 19.

Salsafy (Tragopogon porrifolius.) Scorzonera ( hispanica.

Sow about the middle of April, in rows 10 to 12 inches apart, in a rich, deeply worked soil. Two ounces of Clibrans' Phosphate Manure to the square yard should be thoroughly worked into the soil about a fortnight before sowing. When the plants are about 3 inches high, thin out to 6 inches apart

Common ... ... Per oz. od. | Scorzonera ... ... per oz. sandwich Island Mammoth, produces roots nearly double the size & weight of old variety ...

Savoy (Brassica oleracea bullata).

Sow in March and April, and treat the same as Cabbage, except that 2 ozs. of Clibrans' Nitrogen Manure should be used instead of 3 ozs., as the larger quantity might make the plants too tender to withstand the Wiuter frosts.

> Clibrans' Harbinger, an exceedingly early compact growing variety with firm good sized heads of conical shape, very ... ... ... ...

Dwarf Green Curled, Extra Selected Stock, medium size, finely curled, hearts well; very hardy, early, and a good Winter variety...

Drumhead, the largest variety grown, firm, sweet, and tender after frost'; very hardy; useful for general crop and late Winter use...

Early Ulm, early, dwarf, and compact, superior flavour, quick grower, and one of the best in cultivation; fine for small gardens ...

Ormskirk Late Green, a very large hardy variety, and, being late, comes in when other sorts are over ...

Tom Thumb, a small compact early variety of a deep glossy green colour and delicious flavour; useful for small gardens ...

#### Sea Kale (Crambe maritima).

Sow early in April in rows 1 foot apart, and when the plants are well up, thin out to about 6 inches apart, and the following Spring transplant into deep, rich soil, 18 inches apart. Apply Liquid Manure during the growing season. Two ounces of Clibrans' Nitrogen Manure and 3 ounces of Salt to the square yard would form an excellent dressing for the permanent bed in the late Spring.

Common, per pint, 1/6; per oz., 6d.

Lily White, per oz., 9d.

For Sea Kale Roots, see page 20.

# Spinach (Spinacea oleracea).

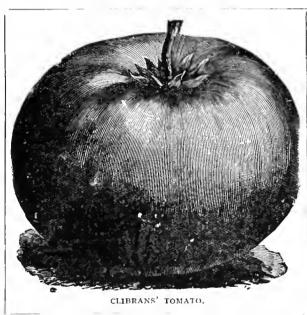

Sow the round-seeded at intervals of ten days, from March to end of June, to ensure a constant supply during the Summer. For Winter use make two or three sowings of the Prickly in August and September. Spinach succeeds best in a sunny position. An application of z ounces of Clibrans' Nitrogen Manure to the square yard a week before sowing will improve both the quality and the quantity of the yield.

	Per oz	-s.	d.
New	Zealand, produces succulent leaves during Summer.

till a fortnight after other sorts per qt., 1/9	0	3
Viroflay, extra large and superior, leaves dark green, thick		
and fleshy, stands well per qt., 1/9	o	3

#### Tomato (Lycopersicum escutentum).

Sow on a hot-bed in March. When the plants are two or three inches high, prick off into small pots, and again into larger ones as the growth proceeds. They are best grown under glass, but will fruit moderately well if planted against a south wall. Frequent applications of liquid manure in the growing season will be beneficial. Dressings of Clibrans' Ideal 'Fertilizer at the rate of one teaspoonful to a 9-inch pot every three weeks during the fruiting season will produce a great increase in the weight of the crop.

Per pkt.—s. d.

Hipper I.—Produces fine clusters of fruit, perfect in shape,
a deep crimson colour, and of the highest quality ... I o

Holmes' Supreme. Medium size, round, smooth, scarlet, firm,

Many other Varieties can also be supplied.

Mr. D. Fowles, gardener to Mrs. Benson, Paignton, South Devon, writes, November 26th, 1904:—"I am highly pleased with Clibrans' Tomato. From 15 plants I gathered over 2 cwt of Tomatoes, many weighing over 1 lb. each. They were a picture when seen at their best."

# Turnip, Garden (Brassica rapa).

Sow at intervals from the end of March to the end of July. The earlier crops should be sown on ground that has been dug over and manured the previous Autumn. When the plants are well up, thin out to about 7 inches apart. As turnips are fond of phosphates, it would be well to apply Clibrans' Phosphate Manure at the rate of 1 oz. to the running yard, and well raked in about a fortnight before the seed is sown. In land where the turnip is liable to become clubbed, a dressing of quicklime, at the rate of 2 lbs. to the square yard, should be applied in as fresh a state as possible during the Winter.

Chinese Artichoke (Stachys tuberifera). When cooked and served with melted butter, they are delicious, and make an acceptable dish. From 1½ to 2 feet is a good distance to range the rows apart, and the plants should be 9 to 12 inches apart in the rows. The tubers should be covered with soil until required for use.

in the rows. The tubers should be covered with soil until required for use.

9d. per lb.; 4/6 per 7 lbs.; 9/- per 14 lbs.

The Chinese Yam (Dioscorea Batatas). An edible tuber, plant climbs something like a convolvulus, and produces heart-shaped leaves and white scented flowers. The tuber is long, and when boiled the flavour is distinct. It should have a warm position and deeply trenched rich ground, Small tubers, 4/- per dozen.

Plants, of Cucumbers, Tomatoes, Vegetable Marrows, Melons, Cabbage, Savoy, Borecole, Brussels Leave, Rush Rush Sprouts, Celery, Cauliflower, Broccoli, &c., can be supplied in their season.

#### CLIBRANS'

# Concentrated Mushroom Spawn,

BEST QUALITY, PER BRICK, 6d.; PER EUSHEL OF 16 BRICKS, 5s.

We make a speciality of Mushroom Spawn and have much pleasure in commending it to the notice of those who have not already given it a trial. The large number of testimonials we are continually receiving, referring to the prolific crops obtained by its use, are in themselves a sufficient guarantee as to its excellence.

#### HOW TO GROW MUSHROOMS.

Mushrooms may be grown in any dark place where the temperature ranges from 50 to 60 degrees. Use fresh manure, almost free from litter, from stables where the horses are fed on dry food. Expose the manure in an open shed for a few days before using it, turning it occasionally to prevent it heating; the great secret in growing fine Mushrooms being to have the manure neither too wet nor too dry, and to avoid it becoming hot, either before or after it has been made into the bed. When making the bed, shake the manure well out, and beat it firmly down, adding more and more till you have a depth of from 12 to 15 inches, and as solid as possible. Thrust two or three pointed sticks in the bed, so that you may afterwards ascertain the temperature, and leave for a few days to heat. When cooling, and you find from the sticks there is a steady temperature of between 70 and 80 degrees, break the spawn in pieces the size of a walnut, and press them firmly, nine inches apart, into the surface of the bed—six bricks will be about sufficient to spawn a bed of four square yards (3 ft. × 12 ft.) After spawning, cover the bed one or two inches deep with stiff loamy soil and beat it firmly down, finishing with an even surface, and cover with a little hay. Mushrooms may be expected in six or eight weeks from the time of spawning, and the bed should continue productive for a couple of months. An occasional sprinkling with tepid water will has\*en their growth, but eare must be used not to give it in excess, as, if the bed becomes saturated, a continuous supply of Mushrooms may be had throughout the year.

When Mushrooms are grown on shelves placed against a wall, the Mushroom house should be situated as much as possible in the shade, in order that the internal temperatures may not be subjected to so much fluctuation by reason of the sun shining on the roof.

Chedington Court Gardens.

1 must mention your Mushroom Spawn; have never seen anything to equal it; have been pulling from bed eight weeks, and they come as thick as ever; splendid mushrooms.

H. Birkinshaw.

# CLIBRANS' SUPERB MIXTURES Of Dwarf Evergreen

WITH OR WITHOUT WHITE CLOVER,

For Lawns, Bowling Greens, Tennis Courts, Cricket Grounds, Etc.

In Ordering, please state Nature of Soil and Situation the Seeds are required for, and

#### HINTS ON FORMING A LAWN.

There is no doubt that the best way to make a good Lawn is by sowing seed, as by this means a perfectly level plot may be secured; and if the soil is free from weeds in the first place, and perfectly clean seed is used, the result is far better, and the cost much less, than if turf is laid. In constructing a New Lawn a considerable amount of care is necessary. The ground should be well trenched, and if very poor, a supply of manure worked in. After this it should be thoroughly levelled and well rolled with a heavy roller, which should be run both ways, and the ground should be raked over again between each rolling, to ensure an even surface, which will not afterwards run into holes. The seed should not be sown before the beginning of April, nor later than September, as young grasses are easily destroyed by frost. From 60 to 80 lbs., of seed per statute acre is the quantity we recommend should be sown in order to obtain a good bottom quickly, or 1 lb. will sow about 50 square yards. Avoid sowing in dry, scorching weather, or the germinating properties of the seed will be destroyed. When sown, the seed should be lightly raked into the ground, and afterwards rolled. If weeds appear they should be carefully removed until the grasses are well established, and to keep the lawn in a good condition, with a close velvety-like appearance, constant mowing and rolling is most essential, as a thick bottom cannot be procured and maintained without the necessary rolling.

For improving Old Lawns which have become bare and patchy, sow 20 lbs. per statute acre. Before sowing, the surface of the soil must be well raked with a strong rake, and afterwards top-dressed with fine soil, and if the land is poor, a top-dressing of Clibraus' Lawn Manure will produce marvellous results. After top-dressing roll the Lawn, sow the seeds, rake them in, and afterwards roll both ways.

Our Mixtures of Lawn Grass Seeds are prepared with the greatest care, and are composed of suitable proportions of fine-leaved dwarf-growing evergreen kinds. The seeds are thoroughly re-cleaned by the latest and most improved machinery on our own premises to free them from weeds and other impurities. Generally the same mixture is sold for sowing under trees, and near towns, &c., as for the open country. Obviously this should not be done, when experience has shown that some grasses will not grow in smoky districts at all. If one of our mixtures specially adapted for the particular situation be sown, much annoyance, apart from pecuniary loss, will be saved.

LAWN GRASSES FOR TOWN SOWING.—This is a Special Mixture of those grasses which, from long experience, are found to survive in the neighbourhood of smoky towns, &c., and will be found of particular value to those who love to see green grass in the midst of "bricks."

Extra Fine Dwanf Evengage House Cross Mixture and the Alexander of the second state of the second s

Extra Fine Dwarf Evergreen Lawn Grass Mixture—per lb. 1/3; per ewt. 135/-Ordinary Mixture—per lb. 1/-; per cwt. 105/-

LAWN GRASSES FOR ORDINARY LAWNS.—This Mixture contains the finest varieties, and will produce that velvety green sward so greatly desired. For reuovating purposes, such as worn-out spots on Lawns, Tennis Lawns, Bowling Greens, &c., &c., it is strongly recommended, as it is composed of the most dwarf evergreen Grasses only.

We solicit a trial, as we are confident that you will be greatly pleased with the result.

Extra Fine Dwarf Evergreen Lawn Grass Mixture—per lb. 1/3; per cwt. 135/-Ordinary Mixture—per lb. 1/-; per cwt. 105/-

LAWN GRASSES FOR UNDER TREES.—Aware of the disappointment incurred through the many futile endeavours to secure a green sward under Trees, &c., we have carefully studied the subject, and as a result offer this mixture, which we venture to think will at any rate prove to be more satisfactory than the seed usually tried. Per lb. 1/3; per cwt. 185/-

CLOVER WHITE DUTCH.—Extra quality for Lawns, 1/6 per lb.

CLIBRANS' LAWN MANURE.—Invaluable for Cricket, Tennis, Croquet, and other Lawns. For prices, &c., see page 61. FINE CHARCOAL FOR TOP-DRESSING LAWNS.—See page 62.

Lawn Sand for destroying Dandelions, Plantains, and other similar Weeds on Lawns, see page 63.

For Lawn Mowers, Garden Rollers, Tennis Markers, &c., see pages 76 and 77.

Dear Sirs,—Please send me 20 lbs., of your best Lawn Grass mixture; Whitney Court Gardens. what we had before from you did splendidly."

Whitney Court Gardens. what we had before from G. Samson.

Mr. F. Fuller, of Grappenhall, says, March 16th, 1903.—" You have the finest Lawn Grass Seeds in this country."

# CLIBRANS' SELECTED

English and Imported

# 

ORNAMENTAL GRASSES and EVERLASTINGS will be found under separate headings (see pages 55 and 56).

#### OUR "SELECTED" STRAINS.

Nature is prodigal in the production of seeds of the large majority of flowering plants, and the ordinary grades of Flower Seeds can be produced in large quantities very cheaply, and sold at a low price. They are ORDINARY in every sense of the word, and cannot be expected

sold at a low price. They are ORDINARY in every sense of the word, and cannot be expected to give the best results.

In order to maintain a certain standard of excellence, a system of careful and continuous SELECTION by skilled growers is absolutely essential; the best types must be preserved, and every plant which shows the slightest degeneracy must be rigorously weeded out. This involves the daily examination of the crop during the flowering period and naturally increases the cost of production, but the result is a strain of improved habit of growth, larger flowers, and richer colouring.

This method of selection has made our strains of Calceolarias, Cinerarias, Celosias, Cyclamen, Primulas, &c., noted throughout the country, and all the seeds we offer being produced by the same painstaking methods, may be relied upon to be as near perfection as it is possible for care and skill to make them.

#### BRIEF DIRECTIONS AS TO SOWING, CULTURE, &c.

The following hints may be useful to those who are inexperienced. Cultural directions are also printed on nearly all of our flower seed packets.

- HARDY ANNUALS .- These require no protection, and may be sown in the open borders, &c., from March till June for Summer and Autumn blooming, and the majority again in August and September for early Spring flowering. They are usually sown where they are to flower, and are amongst the most easily cultivated of all plants, thriving in almost any ordinary garden soil, and if a little care is bestowed in their selection, and successional sowings made, they will yield an abundance of flowers, and afford a magnificent display throughout the season. In sowing, the heights of the plants should be noted, placing the dwarf kinds in front of the beds or borders, and the taller sorts behind. The seeds should not be sown too thickly nor too deep, a covering of half an inch or thereabouts being quite sufficient, excepting in the case of fine seeds, which need only a very thin coating of earth. If the weather is dry, they should be watered freely. Commence to thin out early to avoid over-crowding, and keep free from weeds, so that the plants may become robust and produce fine foliage and well-developed flowers.
- HALF-HARDY ANNUALS .- All in this section flower and mature their seeds in the open air. be sown thinly during February, March or April in pots, pans, or boxes, and placed in moderate heat. Provide ample drainage, and press the soil down firmly before sowing. Cover the seeds lightly and evenly with soil, and water carefully with a fine rose can. If pieces of glass or hand glasses be placed over the pots, &c., an even degree of moisture is maintained, but these should be removed immediately the young plants appear. As soon as the plants are large enough to handle they should be pricked out into pans, boxes, &c., and placed in frames, then gradually hardened off and transplanted in May or the beginning of June. A mixture of loam, leaf-mould, and well-rotted manure, with a little sand, is the most suitable compost. Where heat is not available, sow in April, and place the pans, &c., under hand lights, or in a cool frame, Many kinds will succeed well if sown during May in the open border.
- TENDER ANNUALS OR GREENHOUSE PLANTS .- These comprise some of the most useful and popular plants, such as Balsam, Celosia, Cockscomb, &c., and richly deserve attention where facilities exist for their cultivation. The seeds should be sown from February to April in pans or pots, and placed on a hot bed; or, during the young state, they may be treated similar to half-hardy annuals. Good light, rich soil, with a liberal quantity of sharp sand, is essential. Prick off as early as possible into single pots, and repot into larger sizes as required. Great care must be exercised in sowing the seeds, especially the smaller kinds. Water very sparingly to prevent damping off. Occasional waterings with weak liquid manure will assist the growth of the plants, but this should be discontinued when the blooms appear.
- BIENNIALS AND PERENNIALS .- Many in this section are extremely handsome, but do not flower the first year from seed, and on that account are frequently neglected. The hardy varieties may be treated similar to hardy annuals, sowing the seed from May to July, if possible in showery weather, selecting a shaded situation in preference to one exposed to the sun. When the plants are large enough, transplant into the beds where they are intended to flower. Early sowing is the best, as it enables the plants to become strong enough to stand the severe weather in Winter, and to bloom early and freely the following Spring and Summer. The half-hardy kinds may, in a general way, be treated as tender annuals. If sown in gentle heat in February or March, they will flower the same year.
- MANURES FOR FLOWERING PLANTS.—All flowering annuals love phosphate and potash. As almost every soil in the middle and north of England is deficient in phosphate, we strongly recommend the application of 2 ozs, of Clibrans' Phosphate Manure to the square yard all over the flower beds during the Winter or the early Spring. Clays and strong loams are, as a rule, rich in potash; but light loams and sands are but poorly supplied with it. On such soils, therefore, we advise, in addition to the application of the Phosphate, a dressing of 2 ozs, of Clibrans' Potash Manure to the square yard at the same time as the Phosphate Manure is applied. The two can be mixed together without injury. Clibrans' Nitrogen Manure should be used on flowering beds at the rate of 2 ozs, to the square yard whenever it is considered desirable to stimulate the growth of leaves and stem.

# FLOWER SEED NOVELTIES.

#### Centaurea Honeymoon.

A lovely annual of the Cornflower type. The flowers are bright golden yellow and being borne on long stout stems, are most beautiful for table decorations. Per pkt., I/-

#### Impatiens Holstii Delicata.

An exceeding large flowering hybrid variety. The flower is almost round and of a delicate rosy pink with a darker centre. It is a splendid plant for Summer bedding in half shady situations, as well as for pots. Per pkt., 1/-

#### Lupinus Polyphyllus, Clibrans' Giant Purple

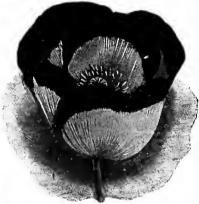

Undoubtedly the finest of all the Perennial Lupins. The plant is of strong and robust habit and produces a large number of enormous flower spikes, each 18 inches to 2 feet in length of a rich shade of bluish purple. A magnificent plant for the herbaceous border. Per pkt., I/-

#### Petunia grandiflora superbissima "Rhiengold.

A beautiful new variety of the large flowering class, the outer edge of the petals is pure white verging into pure yellow in the throat which is unmarred by any of the veins or markings usually found in this class of Petunias. Per pkt., 1/6;

#### Primula Kewensis.

A very distinct and beautiful Primula, producing a number of erect flower spikes 12 to 15 inches in height with a large number of bright golden flowers borne in whorls throughout their entire length. It is almost hardy and is an admirable plant for Winter flowering in the greenhouse. The flowers are exceedingly useful for table decoration, lasting a long time when cut. Per pkt., 2/6

#### flower a striking appearance.

#### Poppy Admiral.

A Pæony flowered Poppy of singular beauty. The flowers are large and cupshaped of a pure glistening white with a broad band of brilliant scarle tround the edge, occupying about a quarter of the corolla. The two colours form a very telling contrast and gives the Per pkt 1/-

#### Scutellaria Baicalensis Coelestina

A hardy perennial from Siberia which bears long spikes of splendid light blue flowers with a light spot on the under lip. It is of upright growth, about 18 inches high and with narrow light green foliage. A sunny situation suits it best. Per pkt., 1/-

#### Sweet Pea Novelties.

See page 51.

# Stock, New Brompton "Monte-carlo."

A beautiful early flowering variety of the Brompton class. It produces an abundance of fine flowers of a delicate canary yellow shade, with strong rich green foliage. The flowers being borne on long stems are of great value for cutting for decorative purposes generally. Per pkt., I/-

#### General List of Flower Seeds.

For brief Cultural Notes see page 21.

ABBREVIATIONS: h.a., Hardy Annual; h.h.a., Half-hardy Annual; t.a., Tender Annual; h.b., Hardy Biennial; h.p., Hardy Perennial; g.p., Greenhouse Plant; cl., Climber.

Abronia h.h.a.

Umbellata, pretty trailing plant, with fragrant Verbenalike flowers, of a rosy-lilac colour. Prefers a light soil. Fine for rockwork. Per pkt., 3d.

Abutilon, g.p.

An easily grown family, much appreciated in every collection of greenhouse plants. Sow in heat and gradually harden off.

Finest Mixture of cross fertilized sorts. Per pkt., 1/-

Acacia, g.p.

Lophantha, handsome yellow flowers, with lovely fern-like foliage, valuable for decorations, &c. Per pkt., 6d.

Mixed, choice varieties. Per pkt., 6d.

Achimenes, g.p.

Extremely showy free flowering plants, valuable for growing in hanging baskets.

Mixed, finest new varieties. Per pkt., 1/6.

Aconitum (Monk's Hood), h.p.

Ornamental plants, producing long racemes of \( \frac{\struck}{\struck} \) handsome flowers. Likes strong soil; the matured plants grow well under the shade of trees.

5. Mixed, various colours, 5 ft. Per pkt., 6d.

**Acrolinium,** see *Everlastings*, page 56.

#### Adonis.

Flos, h.a., bright scarlet, a charming variety, 1 ft. Per pkt., 3d.

Vernalis, h.p., "The flower of the Gods," with beautiful large buttercup yellow, star-shaped flowers, suitable for rockwork, borders, &c., I ft. Per\_pkt., 3d.

#### Ageratum, h.h.a.

Fine bedding plants; very fond of sun. Any ordinary soil will suit them, and plenty of room should be given.

Imperial Dwarf, bluc, \( \frac{1}{2} \) ft. Per pkt., 6d.

Little Dorrit, azure-blue, floriferous, \( \frac{1}{2} \) ft. Per pkt., 3d.

Mexicanum, light blue, 1\( \frac{1}{2} \) ft. Per pkt., 3d.

13 Mexicanum "Little Blue Star." Extremely handsome new variety, the tiny bushy plants, not exceeding 4 to 5 inches in height, being choice not exceeding 4 to 5 inches in height, being densely covered with clusters of feathery flowers, which show, when in bud, a light blue colour with a purplish red centre, when fully open a lovely and bright light blue, the plants being literally a sheet of flowers from early summer until the autumn. Per pkt., 1/-

Ageratum-continued.

Princess Victoria Louise. Every branch produces very handsome umbels of delicately fragrant white flowers, which seem to be covered with a veil of lovely azure blue

stamens. Dwarf compact habit of growth, particularly adapted for edgings and bedding, 3½ in. Per pkt., 6d.

White Gem, very dwarf and compact growing variety, profusely covered with pure white flowers, ¼-ft. Per pkt., 6d.

Agrostemma.

Free blooming, sun-loving plants, valuable for borders.

Coronaria, h.p., deep red, 2½ ft. Per pkt., 3d.

atrosanguinea, h.p., dark crimson, silvery white foliage, I 7 2½ ft. Per pkt., 3d.

Alonsoa, h h.a.

Myrtifolia, with numerous graceful spikes of dainty bright scarlet-vermilion flowers, 2 ft. Per pkt., 3d.

Alyssum.

19

Saxatile Compactum, h.p., yellow, showy, good for sunny rockwork and spring bedding, ½ ft. Per pkt., 6d.

Sweet, h.a., white, free flowering, suitable for beds and edgings, ¾-ft. Per pkt., 3d. 20

Amaranthus h.h a.

Ornamental foliage plants, fine for beds, &c.

Henderi, brilliant scarlet crimson foliage, 3 ft. Per pkt., 6d.

Melancholicus ruber, blood-red leaves, 1 ft. Per pkt., 3d. 22 Amaryllis (Hippeastrum), g.p.

Hybrida, saved from the most beautiful hybrids. Per pkt., 2/6.

Anagallis, h.a.

Richly coloured, sun-loving annuals.

Grandissor coccinea, deep vermilion red, 3-ft. Per pkt., 6d. — cœrulea, intense blue, 3 ft. Per pkt., 6d.

Anchusa.

Very showy hardy border plants. The honey-bee is very partial to this genus.

Italica, h.p. Long vigorous spikes of bright blue flowers, One of the best, 4 ft. Per pkt., 6d.

Anemone, h.p.

Well-known hardy plants, with beautiful flowers.

Coronaria (Single Poppy Anemone), choice mixed. Per 27 pkt., 6d.

28

Fulgens (Scarlet Windflower). Pcr pkt. 1/Japonica "Honorine Jobert," splendid variety, producing large, pure white flowers from August to November.

Invaluable for border flowers and cutting. Per pkt. 1/
"St. Brigid." Blooms are large, handsome, and remarkable for their diversity of colour. They are exceptionally free blooming, and require the simplest treatment, \(\frac{1}{4}\) ft. Per pkt., 1/-

#### Angelonia, g.p.

Grandiflora Alba, very graceful table plant, its numerous, pure white flowers standing out in handsome contrast with the elegant dark green lanceolate foliage. Per pkt 1/-.

#### Anthemis, h.p.

Tinctoria, the golden yellow, single Paris Daisy, very floriferous, 1½ ft. Per pkt., 6d.

ANTHEMIS TINCTORIA.

#### Anthericum, h.p.

Very attractive border plants, with pure white gladiolus-like

flowers; prefer a dry position.

Liliago, "St. Bernard's Lily," pure white, very free, of exceptional grace and beauty, 1½ ft. Per pkt., 1/
Liliastrum, "St. Bruno's Lily," pure white, large, fragrant, 1½ ft. Per pkt., 1/-

#### ANTIRRHINUM (Snapdragon). h.p.

Very showy free blooming plants, especially desirable for beds and borders.

35 Clibrans' Dwarf Scarlet. A magnificent variety, growing about 12 inches high and producing an abundance of dazzling scarlet flowers. Per pkt., 1/-

36 Clibrans' Dwarf Rose. Similar in habit to the above, bearing a profusion of flower spikes of charming shade of bright rose.

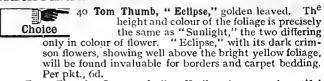

Per pkt., 1/ Majus, Cholce Mixed. Beautiful free flowering, hardy border plants. The seed offered is our own saving from the most beautifully marked flowers. Per pkt., 6d.
— Grandiflorum, very large flowers; the habit of the plant is robust, and the flowers are nearly double the size

38 of the ordinary varieties, whilst the colours are very vivid

and striking. Per pkt., 6d.

Queen Victoria. This splendid Snapdragon has elegant finely-cut foliage, with unusually large flowers of a brilliant white, which are borne in great profusion on long and graceful flower stalks. Per pkt., 6d.

#### Antirrhinum—continued.

flowers, spotted and striped with carmine, is almost indispensable for borders and carpet bedding. Per pkt.,

- Yellow Queen. An undoubted acquisition; the 43 plants are dwarf and free, the blooms large and beautiful

in form, and closely set on the stem. Per pkt. 6d.

— — mixed. Indispensable, either as single plants in open border, or massing in mixed borders. Per pkt. 6d.

#### **AQUILEGIA** (Columbine), h.p.

Free flowering, brilliant and graceful; admirably adapted for beds, borders, shrubberies, &c.

45 Long Spurred, perfectly hardy, producing abun-dantly large and elegantly shaped flowers Choice dice with long spurs, which are borne well above the foliage, extra selected varieties, comprising yellow, blue, white, rose, red, and various intermediate shades, in mixture. Per pkt. 1/Alba plena, double white, 2 ft. Per pkt. 6d.

47 48

Carilea, a lovely blue species, 1\(\frac{1}{2}\)ft. Per pkt. 6d.

— hybrida, blue and white, 1\(\frac{1}{2}\)ft. Per pkt., 6d.

Californica hybrida, yellow, tinged with orange, spurs orange red, very showy, 12ft. Per pkt. 6d.

Canadensis, scarlet and vellow, 2 ft. Per pkt. 6d.

Chrysantha, primrose yellow, tipped claret, 2ft. Per pkt, 6d, grandiflora alba, beautiful form, with large, pure white, flowers, produced in great profusion, 2 ft. Per pkt., 1/-

Glandulosa, lilac, deep blue and white, very prefty, 2 ft. Per pkt., 1/-

Skinnerî, red and yellow, 2 ft. Per pkt., 6d. Stuarti. Early, hardy, and attractive variety, with flowers 4 in, and more in diameter; the broad, fine blue sepals produce a striking contrast to the white corolla. Per

Mixed, Extra Choice. Per pkt., 6d.

#### Arabis, h.p.

Alpina, white, lovely for bedding and rockwork, ½ ft. Per pkt., 6d.

Aralia, g.p.

Sleboldi (New Seed ready end of April). Ornamental foliaged plant, for sub-tropical gardening, &c., 4 ft. Per pkt., 1/-

Arctotis.

Choice

oice

50 Grandis. Ilandsome new annual from Southwest Africa, growing luxuriantly in our climate, and forming profusely branched bushes of about 2 to 2½ ft. in height and breadth. The flowers, quite 3 in. in diameter, are pure white, with a narrow yellow ring round the centre, with which the light blue of the disc florets and their delicate white stamens make a very effective contrast: the ray florets being make a very effective contrast; the ray florets being lilac on the reverse side. The plant is of easy culture, and when placed in a sunny position will bloom all the Summer. Per pkt., 6d.

**Arnebia Cornuta,** h.h.a.

Very pretty and continuous blooming annual of a rich yellow, with black spots, 2 ft. Per pkt., 1/-

Asparagus, g.p. Exceedingly graceful plants, useful for decorations, and well adapted for sprays and mixing with cut flowers; also makes excellent pot plants.

Plumosus nanus. Per pkt., 1/-.

Sprengeri. Per pkt., 1/-

Asperula, h.a.

Azurea setosa, sky blue, charming clusters of fragrant flowers, free, fine for cutting, 1 ft. Per pkt., 3d.

# Clibrans' Superb Prize Asters, h.h.a.

Our Aster Seeds which are saved from the choicest flowers only, have been very fine during past seasons, producing magnificent blooms in great profusion. We beg to state that we have again procured our supplies from the same reliable sources.

91

Betteridge's Prize Giobe Quilied, in 12 separate colours. Per pkt., 2/6.

In six separate colours. Per pkt., 1/6. Finest Mixed. Per pkt., 6d., 1/-, and 2/6.

Christmas Tree. A most striking variety; the branches stand horizontally, and thus differ from all existing types. It comes early in bloom, and is very profuse flowering. Finest mixed colours. Per pkt., 6d., 1/-,

and 2/6.

Comet. The varieties in this section are of dwarf habit. The flowers are extremely beautiful, resembling the large-flowered Japanese Chrysanthemum.

- Snow White. Flowers very large and composed of long pure white florets. Per pkt. 6d., 1/-, and 2/6.

- In six separate colours. Per pkt., 1/6. 60

— Choice Mixed. Per pkt., 6d., 1/-, and 2/6. 70

- Empress Frederick. The flowers are of the purest white, 4 to 5 inches in diameter, and of the most refined form. The main stem bears a superb flower of extra large size, which is surrounded and partly overtopped by other fine globular blooms. Per pkt., 1/-71

- Dwarf Perfection White. This beautiful variety blooms early in July, and bears flowers much larger than the ordinary Connet type, the petals being long and beautifully curled. 8 in. Per pkt. 6d., 1/-, and 2/6.

- Giant, The Bride. The flowers are at first pure white, then changing to rose, and finally of a beautiful rose The colour is most effective. Per pkt. 6d., 1/and 2/6.

- The finely curled Comet, Glant, Ruby. flowers open a glowing scarlet, turning at the close of flowering into dark scarlet. Pkt. 1/-
- Comet, Single, pure white. As single-flowering Asters have lately come into favour, owing to their usefulness for cutting, this variety with large and long petalled pure white blooms, will no doubt be welcome. Per pkt., 1/-Crown or Cocardeau (White centres).

76 - Finost Mixed. Per pkt. 6d., 1/-, and 2/6.

Dwarf Bouquet, in eight separate colours. Per pkt., 1/6. 77 - --- Finest Mixed. Per pkt. 6d., 1/-, and 2/6. 78

- Dwarf Chrysanthemum-flowered, in 12 distinct colours. 79 separate. Per pkt., 2/6.
- --- In eight distinct colours, separate. Per pkt. 2/-80

- Finest Mixed. Per pkt. 6d., 1/- and 2/6. 81

Imbricated Pompon, Choice Mixed. Excellent for bouquets-Per pkt., 6d., 1/- and 2/6.
Jewel or Ball. Flowers highly attractive, in size a little smaller than those of the Prony-flowered race; petals numerous and so symmetrically incurved as to give to the blooms the shape of a perfect ball. Very useful for

- Choice Mixed, Per pkt., 6d., 1/- and 2/6. Lady. Distinct from all others both in freedom of flowering and foliage. Leaves long and narrow, and of a striking light green colour. Valuable for bedding, pots, or cutting

Dots, of cutting—White (Lady in White). Superb variety. Per pkt., 6d., 1/-, and 2/6.

iput. A charning variety; the flowers are small, but the abundance with which they are produced is remarkable. Liliput. Recommended either as a pot plant or for cut bloom.

- Mixed Colours. Per pkt., 6d., 1/- and 2/6. Mignon. The beautiful and popular Mignon class has produced a form with a low habit of growth. The following (growing about 10 inches high), are of striking beauty, and for beds and borders, for cutting, and as pot plants, they cannot fail to prove of immense value.

— Pure White. Per pkt. 6d., 1/-, and 2/6.
— Lilac. Towards the close of the blooming period this 86 87 the variety retains the delicate charm of its lilac shade until the very last. Per pkt. 6d., 1/-, and 2/6.

— Dwarf Rosy Carmine. Per pkt. 1/- and 2/6.

— Dwarf White. Per pkt. 1/- and 2/6.

88 89

- Mignon, Mixed, containing light blue, lilac, rose, carmine rose, crimson, also white. Per pkt. 6d., 1/-, and 2/6.
   Ostrich Feather or Hohenzollern. This beautiful variety
  - is of candelabra-shaped habit, and of strong growth, The flowers are unusually large, very double, somewhat resembling the Japanese Chrysanthemum.

    — Pure White. 8 in. Per pkt. 1/- and 2/6.

- Rose. 8 in. Per pkt. 1/- and 2/6. 02
  - White, changing to Rose. 8 in. Per pkt., 1/- and 2/6.
- Choicest Mixed, Per pkt. 6d., 1|- and 2/6.

- Princess White, or Snowball, Pure white flowers. form they are semi-spherical, and composed of quite short and very thickly-set imbricated petals. It is very floriferous, and of dwarf and compact habit. Per pkt. 6d. 1/and 2/6.

#### **Broom** (Spartium).

Graceful, attractive, and accommodating.
White Portugal, pure white, very free. Per pkt. 6d.
Yellow Spanish, showy, yellow, fragrant flowers. Per pkt.,

Browallia, h.h.a.

Very useful for conservatory and greenhouse decoration, or cutting purposes.
Elata cœrulea, deep blue, 11 ft. Per pkt., 3d.

Cacalia, h.a. (Tassel Flower.) Grow almost anywhere

148 Coccinea (Flora's Paint Brush). Dense heads of scarlet flowers, fine for cutting, 1½ ft. Per pkt., 3d.

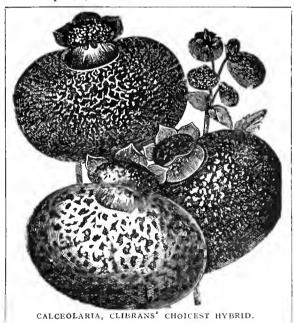

#### **Calandrinia**, h.a.

Free-blooming, dwarf-growing plants, do best in sunny situations and in an open soil.

Speciosa. Deep purple crimson, showy, 1 ft. Per pkt., 3d.

#### CALCEOLARIA, g.p.

CLIBRANS' GOLD MEDAL STRAIN. Awarded Choice Gold Medal Manchester Royal Botanic Society. Our Gold Medal strain of Calceolaria is unsurpassed. Visitors to our Nurseries during the blooming season are charmed with the magnificent display, and each year the plants are dwarfer, and the flowers more brilliant and diversified. The flowers are of great size and substance, full globular shape, and the first, varied, and brilliant markings are exquisite and gorgeous. Per pkt., 1/6 and 2/6.

The Gardens, Barkway House,

Nr. Royston,
Dear Sirs,—The Calceolarias I have grown from your seed this year have been admired by everyone who has seen them. I have some plants in 16 inch pots 3 feet in diameter.—Yours faithfully, J. E. PARKER.

#### The Gardens

Plas Dinan, Llandinam, Mont, Gentlemen,—From your Calceolaria Seeds last year there was not two plants of the same colour, the flowers were simply lovely, and admired by all who saw them.—D. Thomas.

Hybrida Cornuta. On each side of the flower the dorsal 151 petal forms a horn-like projection of the same colour and texture as the rest of the flower. This gives the flowers a very pleasing appearance. Per pkt. 1/6 and 2/6.

Shrubby Bedding Varletles, extra choice, mixed. Per pkt.

152

#### Calendula, h.a.

Excellent plants for mixed borders.

Officinalis fl. pl., "Favourite." Light sulphur, striped with creamy-white. It is the lightest-coloured variety of the whole collection. Per pkt., 3d.

- Meteor. Orange striped flowers, 1 ft. Per pkt., 154 3d.

CALENDULA, h.a. -continued

- -grandiflora sulphurea fl. pl. Splendid variety, producing large double sulphur-yellow flowers. Per pkt.,
- Le Proust, double nankeen yellow, very fine, I ft. Per pkt., 3d.
- Orange King, rich orange, extra double, 1 ft. Per pkt.,
- Pluvialis (Cape Marigold), white, 1 ft. Per pkt., 3d.

#### CALLA.

Eillottlana (Richardla). Trumpet of a very rich pure yellow colour, and dark green leaves conspicuously and evenly marked and spotted with white. The plant is of medium height and quite distinct from any other species of Calla. Sow early in January (or as soon as received) in pots or pans, and place in a temperature of 65 degrees. pkt. 2/6.

#### CALLIOPSIS.

Very showy free flowering plants, useful for cutting, and fine for town gardens.

clnsonl, lt.a. Yellow and brown, 2 ft. Per pkt., 3d.

160 Atkinsoni, li.a.

- 161 Atrosangulnea, h.a. Rich dark crimson, 3 ft. Per pkt., 3d. 162 Coronata, h.a. Orange, spotted brownish purple, large, 2 ft.
- Per pkt., 3d. Drummondl, h.a. 163 Yellow, with rich bronze circle, large and free, 1½ ft. Per pkt., 3d.
- 164 Grandiflora, h.p. Large golden-yellow flowers, fine for cutting purposes, very showy and free, 3 ft. Per pkt., 3d.
- 165 Lanceolata. h.p. Rich golden-yellow, very showy. pkt., 6d.
- Tinctoria, h.a. 166 Yellow, with dark brown blotch, very pretty,
- 3 ft. Per pkt., 3d.

  "Tom Thumb," Crimson King. Very compact, forming a perfect little bush covered with rich dark crimson flowers, 167 very showy, bedding annual, 1/2 ft. Per pkt., 6d.

#### CAMPANULA.

- See also Canterbury Bells. A beautiful class of easy culture; all are free flowering, and make a brilliant display in mixed borders. Some of the varieties succeed well in pots. The dwarf varieties are adapted for rockwork.
- Calycanthema, h.b. Purple, semi-double resembling a cup and saucer, 2 ft. Per plet., 6d. 168
- alba, h.b. Similar to preceding, but flowers are white, 169 2 ft. Per pkt., 6d.
- 170
- Carpatlea, h.p. Blue, ½ ft. Per pkt., 3d.

  —alba, h.p. White, I ft. Per pkt., 3d.

  Grandiflora, h.p. Purplish blue; fine for conservatory, or open border; superb; 2½ ft. Per pkt., 6d.

  —alba h.p. Fine white flowers, similar in habit to preceding. Per pkt., 6d.

  Persetfolla Grandiflora. A valuable variety with large blue 172
- Persicifolla Grandiflora. A valuable variety, with large blue flowers almost twice the size of the type, which is one of our most useful hardy perennials for the border. Per
- Pyramidalis, h.p. Light blue, profuse bloomer, the best for pots, and fine for borders, 3 ft. Per pkt., 6d.
- alba, h.p. White variety of preceding, 3 ft. Per pkt., 6d.

- CAMPANULA-continued.
- 177 Pyramldalis compacta (Syon House Varlety). Quite distinct from the old form, the plants being dwarfer, and flowers larger and deeper blue, with more substance. Per pkt., 1/-
- Turbinata, h.p. Violet-blue, pleasing variety, ½ ft. Per pkt., 6d. 178
- alba, h.p. Pure white, very beautiful, ½ ft. Per pkt., 6d. 170

#### Canary Creeper, see Tropwolom Canariense.

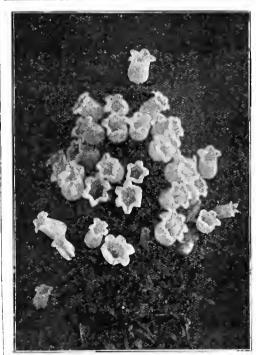

#### CANNA, h.h.p. (Indian Shot).

- Handsome foliage plants for sub-tropical garden and mixed borders.
- Crozy's New Dwarf, large flowered, choice mixed, from the 180
- best named varieties, 3 to 4 ft. Per pkt., 1/Variegata. Flowers brilliant scarlet. The leaves are light
  green, thickly splashed, lined and barred with red and yellow, and margined with clear crimson. Per pkt., 1/-

#### CANNABIS, h.h.a.

- Do well as a rule in town gardens.

  182 Glgantea (the "Giant" Hemp), handsome, graceful foliage, most effective, 10 ft. Per pkt., 3d.
  - CANTERBURY BELLS, h.b., see also Campanula. Showy free-flowering plants, with large bell-shaped flowers, effective in shrubberies and mixed borders.
- 184

symmetrical in form, and of the richest and most varied colours. It is unsurpassed for exhibition purposes and greenhouse decoration. Per pkt. 1/6 and 2/6.

Mr. C. J. Johnson, The Gardens, Abbey Villa, Milton, writes :-

"I am pleased to inform you that the Cinerarias and Calceolarias we had from you are magnificent. Nothing has ever been seen in this district approaching them.'

31

#### Cineraria—continued.

Press Opinions of Clibran's Prize Cinerarias :-

"They displayed a remarkable colouring, some pure selfs, rose, purple, (almost black, so deep was the shade), crimson, white, and white with crimson tips to the florets, while some have half of the florets covered with purple, rose, or other good shade. A delightful strain because the colours are fresh and decided."— Country Life.

"This strain is remarkable for its robust habit as well as for its pure form and rich clear colours of the flowers produced. They represent pure white, white and blue, white and purple, pale blue, mauve, dark blue, red, and crimson shades, the self-colours being especially rich and effective."—Gardener's Magazine.

Single, Dwarf Large Flowered, a beautiful compact-growing variety, height from 6 to 8 in., with large handsome flowers of various shades. Per pkt., 2/6.

- Hybrida Grandiflora Alba, white, very large flowers, 267 splendid strain. Per pkt., 2/6.

Blue Flowered. Flowers vary from lavender to the deepest blue or violet as those of blue Primroses. While the flowers of the latter are often hidden by the foliage, the Polyanthus show their umbels on long stems well above. Per pkt. 1/-

Choice Mixed, from a splendid strain. Per pkt. 6d. and 1/-653

Choice Mixed, Gold Laced. Per pkt. 1/-

Cloth of Gold, splendid yellow. Per pkt. 1/-655

White Queen. White, large trusses. Per pkt. 1/-656

### POPPY.

Rare and beautiful varieties of exquisite hues have been introduced the whole forming a splendour of colour unequalled in diversity and richness. All are perfectly hardy.

#### Annual Varieties.

"American Flag." A beautiful Pæony-flowered Poppy, 657 bearing large double flowers which are pure white, margined dark orange-scarlet; very effective. 2 ft. Per pkt. 6d.

658 New

Admiral. Per packet, 1/-. See Novelties page 22.

### POPPY-Annual Varieties-continued.

- 658a Cardinale Hybridum. The colours of the flowers are very attractive, being chamois and bright pink on light ground, purple crimson, and rose on blackish brown or violet ground; 1½ft. Per pkt. 6d.
- 650 **Danebrog, Victoria Cross.** A pretty variety, producing brilliant scarlet flowers, the base of the petals being blotched with silvery white, 2 ft. Per pkt., 3d.
- 660 Double Carnation, Scarlet, large, beautifully fringed, 2 ft. Per pkt. 3d.
- 661 Mixed. Various bright colours, flowers very double and fringed, 2 ft. Per pkt, 3d.
- 662 Double Dwarf French, Choice Mixed. Charming combination of brilliant colours, 2 ft. Per pkt. 3d.

- 664 **Lævigatum.** Large, finely-shaped flowers, brilliant deep scarlet, with black spots and white markings at the base of the petals; free and showy, 2 ft. Per pkt. 6d.
- May Campbell. A distinct variety, being a very dwarf form of the well-known Poppy "Snowdrift." The lovely double flowers, which are of a snowy whiteness, are borne in great profusion, and the petals being delicately cut, add beauty and grace to the bloom. Invaluable for beds and as a cut flower, if gathered before the bud is fully expanded. Per pkt. 6d.

- Mikado (Striped Japanese Poppy), one of the most charming sorts of the whole family. The flowers are perfectly double and deeply laciniated. The colour most attractive, being pure white at the back, whilst the tringed edges are of a brilliant crimson-scarlet, 2 ft. Per pkt. 3d.
- 667 MIss Sherwood. A very striking and beautiful singleflowering variety of the Pæony-flowered Poppy, growing about 3 feet in height, and producing in rich profusion single flowers of shiny satiny white, the upper half of the petals being silky chamois pink, forming a deficate combination. Per pkt. 6d.
- Pavonium (Peacock Poppy). A beautiful single variety with brilliant scarlet flowers which have a conspicuous black zone at the base of the petals. The blooms are large, and produced in great abundance, 1½ ft. Per pkt. 6d.
- Pmony-Flowered. Immense double tlowers of the most brilliant and showy colours, finest mixture, 3 ft. Per pkt. 3d.

### POPPY-Annual Varieties--continued.

- 671 Shirley. A remarkable and beautiful strain. The colours range from pure white through the most delicate shades of pale pink, rose, and carmine, to deepest crimson, and so varied that scarcely two will be found exactly alike, many being most delicately edged, shaded, and striped. Very valuable for table and general decoration, as the blooms when cut young, will stand for several days without dropping; 2 ft. Per pkt. 6d.
- 572 Snowdrift, a pure sating white variety, belonging to the same family as the "Double Carnation" Poppy, large, full, and double, resembling a white Japanese Chrysanthemum. Useful for cutting, 2\frac{1}{2}ft. Per pkt. 3d.
- 673 The Bride. A pure white single selection from P. somniferum; the flowers are large, freely produced, and if cut when barely expanded will remain fresh a considerable time, 2 ft. Per pkt. 3d.
- The Tulip (Papaver Glaucum). A magnificent species.

  The flowers resemble the well-known "Scarlet Duc Van Thol" Tulip. It blooms abundantly for a period of six to eight weeks, and is a most valuable addition to our decorative annuals, 11ft. Per pkt. 6d.
- 675 **Umbrosum,** a single-flowering variety of dwarf habit; colonr glowing crimson-scarlet, with a jet black spot on each petal, one of the best,  $1\frac{1}{2}$  ft. Per pkt. 3d.
- 676 White Swan. A splendid variety, flowers very double, laciniated, beautifully shaped, and pure white. It blooms in great profusion, and is very effective, 2 ft. Per pkt. 3d.

### POPPY.-Perennial Varieties.

- 677 **Bracteatum.** A grand variety, deep crimson flowers, similar habit to the *Orientale*; early flowering, 3 ft. Per pkt. 3d.
  - Californian Poppy, see Romneya Coulteri.
- 678 **Nudicaule** (Iceland Poppy). Choice strain. Beautiful showy bright yellow flowers, 1 ft. Per pkt. 6d.
- 679 **album**, pure white variety of above, and similar in habit, 1 ft. Per pkt, 6d.
- (80 coccineum flore pleno. A most attractive form of the lccland Poppy, colour bright orange-scarlet, producing about 50 per cent, of double flowers from seed. A valuable addition to this popular family, 1 ft. Per pkt, 1/-
- 681 miniatum. Bright orange-scarlet flowers, similar in habit to preceding varieties; a striking contrast, 1 ft. Per pkt. 6d.
- 682 Mixed colours, 1 ft. Per pkt. 6d. and 1/-
- 683 Orlentale, handsome variety, large dark scarlet blossoms, blotched with black; effective and showy, 3 ft. Per pkt, 6d.
- The Great Yellow Mexican Poppy (Eschscholtzia fumarice-folia). This is a magnificent perennial Eschscholtzia, and is about as hardy as "Romneya Coulteri"—the flowers being large and of striking appearance—colour may best be likened to "Eschscholtzia californica." Per pkt. 1/-
  - Welsh Poppy, see Meconopsis cambrica.

#### PORTULACCA, h.h.a.

- Charming plants, producing an astonishing display of dazzling colours. Prefer a light soil.
- 685 Choice Mixed. all colours, & ft. Per pkt. 6d.

### POTENTILLA, h.p.

- Handsome plants of free growth for mixed borders, rock work, &c.
- 686 Double Mixed. Brilliant colours, 11ft. Per pkt. 6d.

PRIMROSE, h.p.
Prlmrose—Polyanthus. Clibrans' Superb Strain. from plants that were selected with the greatest care from the thousands grown at our Seed Trial Grounds. several years our beds have been the admiration of all who saw them, not only for their exceptionally large pips and magnificent trusses but even more for their soft velvety sheen and brilliant colouring. Per pkt. 1/Cholce Mixed. This is a magnificent strain of these lovely

688 Spring flowers, selected from the most beautiful shades of rose, purple, crimson, white and yellow, ½ ft. Per pkt.1/-

689 Common yellow. The wild variety of the wood, \frac{1}{2} ft. Per Primrose—continued.

Crimson, rich crimson, invaluable for spring bedding, ½ ft.

Per pkt. 1/Irish varieties. In many lovely colours, invaluable for Spring bedding, ½ ft. Per pkt. 1/G. F. Wilson's New Blue, Hardy. The flowers of this beautiful for their colour, developtiful Primrose are remarkable for their colour, developing into many shades of blue, from pale lavender to deep violet. They are produced on foot-stalks rising well above the foliage, and are fully equal in size, shape, and duration to the older varieties. Several Awards of Merit from the R.H.S. Per pkt. 1/-

From Mr. J. B. Wadeson, Secretary of the Ingleton Horticultural Society:-'Please send me a 2/- pkt. of your 'Hybrid Primrose' and 1/- pkt. of 'Blue Primrose.' Your strain has been much admired both for size and markings of blooms."

#### CLIBRANS' SUPERB STRAINS OF SINENSIS FIMBRIATA. PRIMULA

There is no more valuable Winter and Spring flowering decorative plant for the conservatory than a good strain of Primula, and considerable care is necessary in order to secure successful germination of the seed. The best method is to sow in well-drained shallow pans, covering the seeds lightly, in fine soil, consisting of leaf mould and sandy loam, which should always be kept as near the same degree of moisture as possible, and never allowing it to get too dry. The varieties we offer have been saved with the greatest care from the largest fringed flowers of the finest substance, and most distinct colours. Numerous testimonials are frequently received from patrons who grow our superb strains of Primulas,

#### SINGLE VARIETIES.

694

CLIBRANS' GIANT SCARLET. Exceedingly bright scarlet flowers of great substance,

Speciality

and beautifully fringed, a strong and robust grower. Per pkt. 2/6.

CLIBRANS' GIANT WHITE. A magnificent giant Primula of pyramidal form, producing large pure white flowers, which form a striking contrast to its dark leaves. Per pkt. 2/6.

Almandine. Dark vermilion with a small eye, perfect in 695

form, and a profuse bloomer. Per pkt. 2/6.

Alba magnifica. Large pure white, beautifully fringed. Per 696 pkt. 1/6 and 2/6.

Avalanche. Pure white with yellow eye, large and exquisite-607 ly fringed, foliage dark green. Per pkt. 1/6 and 2/6.

Chiswick Red. Brilliant crimson-scarlet, free-flowering, 699 substance and habit good. Per pkt. 1/6 and 2/6. Crlmson King. A most exquisite variety, distinct and early;

700 very profuse and continuous bloomer; colour deep rich crimson, an almost black band surrounding the eye of the flower. Per pkt. 2/6.

Duke of York. Prettily fringed flowers, of the richest and most intense shade of madder-crimson. Produces the trusses of bloom well above the foliage. Per pkt. 2/6

Marquis of Lorne. A beautiful variety, with magnificent red flowers, of great size and substance. Per pkt. 1/6 702 and 2/6.

toor. Intense crimson, bright yellow eye, with beautifully fringed petals. Per pkt. 1/6 and 2/6. Meteor. 703

Oidfield Biue. One of the best Blue Primulas, flowers large 704 and beautifully fringed; compact and free; requires more heat for its successful cultivation than other varieties. Per pkt. 2/6.

Pink Perfection. Large blooms of a rich pink colour, with beautiful crenulated margin, profuse bloomer. Per pkt.

Princess Louise. A splendid giant-flowering strain of vigor-706 ous growth, producing pure white blooms of great size and substance. Per pkt. 1/6 and 2/6.

Princess May. Large pure white flowers, with an exquisitely 707 crenulated margin, produced with freedom well above

the foliage. Per pkt. 2/6.

Princess of Wales. One of the prettiest, flowers very large, 708 of a beautiful fleshy-carmine colour. We strongly re-commend all growers to try this fine variety. Per pkt. 1/6 and 2/6.

Reading Scarlet. One of the finest high-coloured Primulas ; flowers very large and of intense rich scarlet colour, very free flowering. Per pkt. 1/6 and 2/6.

710 Ruby Queen. The flowers of this exquisite Primula are of a Primula are of a Primula ruby-crimson colour and of great substance. A charming variety. Per pkt. 1/6 and 2/6.

711 Snowdon. Flowers snow-white, of great size and substance, beautifully fringed and crenulated, the petals overlapping in such a manner as to impart to the blooms a depth that is quite remarkable. Per pkt. 2/6.

PRIMULA, SNOWDON.

712 Snow Queen. Neat and compact habit, the flowers are thrown well above the foliage, which is light green, slightly inclined to "fern leaf," and prettily crested; the blooms are of a pearly whiteness, relieved by a medium

eye of pale yellow. Per pkt. 2/6.

Red, Choice Mixed. This is a mixture of the finest strains of choice red varieties in different shades, and cannot fail to afford the greatest satisfaction. Per pkt. 1/- and 2/6.

#### PRIMULA, Single Varieties—continued.

White, Choice Mixed. This is a mixture of the very finest varieties of white Primulas. Per pkt. 1/- and 2/6.

Superfine Mixed, all Colours. For those who do not care

715 to grow the different colours separately, we recommend our mixed seed, which will produce a fine display of large blooms of various shades. Per pkt. 1/- and 2/6.

### FERN-LEAVED (FILICIFOLIA) VARIETIES.

Glant Red, a superb new giant-flowering straiu, producing large beautiful fringed blooms of fine substance. Per pkť. 2/6.

Snowflake, produces large trusses of pure white single flowers of fine form and great substance. Per pkt. 1/6 and 2/6.

The Queen, flowers pure white, very large and of great substance, distinct free-flowering variety. Per pkt. 2/6.

Fern-leaved, White, beautifully fringed. Per pkt. 1/6 and

DOUBLE VARIETIES.

# Choice

721

MRS. CLIBRAN, charming and beautiful semi-double, blush-pink variety, plant dwarf and compact, very free. Pkt 2/6.

Winter, Queen Alexandra. Similar in habit to the above but differing in colour, which is a delicate tint of rosy lilac. Per

### Stokesia, Cornflower Aster.

830 Cyanea. Rich blue flowers over 2 inches across, similar to a double Aster, flowering in early winter, 11 ft. Per pkt.

### Streptocarpus, g.p.

New Hybrids. The plant is of dwarf habit, remarkable for the abundance of bloom and continuous succession in which the flowers are produced. If seed is sown in January or February, the plants come into bloom the following June or July. Per pkt. 1/6 and 2/6

### Sunflower, (Helianthus), h.a.

Majestic old-fashioned flowers with attractive bright golden Majestic oid-tashioned howers with a tractive bright golden blooms. They are well adapted for the decoration of mixed flower borders or shrubberies, while the immense profusion of bloom makes them invaluable for cutting. 3 ozs. of Clibrans' Nitrogen Manure to the square yard should be dng into the ground intended for Sunflowers a few days before the seed is sown.

- Annuus, or Tail Single. The ordinary variety, 5 ft. Per 832 pkt. 3d.
- Primrose coloured, very pretty, 5 ft. Per pkt. 833
- Argyrophyllus. Silvery woolly foliage, small single yellow 834 flowers, with black disc, 5 ft. Per pkt. 3d.

  Californicus fi. pl. Large double yellow flowers, 5 ft. Per
- pkt. 3d. Cucumerlfoilus, exceedingly floriferous, producing an abun-
- dance of bright golden yellow flowers, with dark centre,
- 2 ft. Per pkt. 3d.

  "Diadem." This is a variation from the popular Sunflower "Stella" The flowers are of the same form and size, but the colour is a pure light lemon, with a black centre. It will be found of great value for cutting, 2 ft. Per pkt. 6d.
- Hybrids. Some of the flowers resemble 838 a single Cactus Dahlia, some have dark and others light centres. In colour they Choice vary from the richest orange to almost white, while in some both extremes in colour appear on the same petal, richest at the base and fading off at the tip, whilst some plants produce both double and semi-double flowers. Much appreciated for cut bloom and general decorative
- purposes, Per pkt. 6d.

  "Orlon." An effective variety of the Sunflower
  "Stella." The petals are twisted like those of the Cactus Dahlia, making the flower very useful for decorative purposes. Per pkt. 6d.

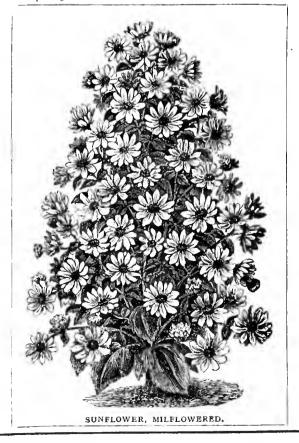

Sunflower—continued.

840 Cucumerifollus, "Stella." Attains a height of 3 to 4 ft., and differs from the parent form by its larger and better formed flowers of the purest golden yellow, with a black disc. The individual blooms, 2½ to 3 in, across, are all borne on long stems, and rise well above the small foliage. Per pkt. 6d.

Cucumerifolius flore pleno. This is another variety of the popular Miniature Sunflower, producing semi-double and double flowers. Over 60 per cent. come true from seed, and afford excellent material for cutting. Per pkt. 6d.

Globosus fistulosus, fl. pl. Large, extremely double globe-shaped flowers of a bright rich yellow colour, 6 ft. Per

Sunflower—continued.

Sunflower—continued.
843 Leviathan, or Russian Giant. A large tall-growing single variety, 6 ft. Per pkt. 3d.
844 Milflowered. Very robust variety, attaining a height of 12 to 15 feet, and does well if planted singly on lawns, &c. Of pyramidal habit, branched from base to top, and produces a multitude of medium-sized golden-yellow flowers, with small black centre, which are valuable for cutting. Per pkt. 6d.

cutting. Per pkt. 6d.

New Miniature, a beautiful variety, flowers golden-yellow with black centre, useful for cutting, 4 ft. Per pkt. 3d.

Uniflorus, enormous single yellow flowers, 6 ft. Per pkt.

846

Tall Double, 5 ft. Per pkt. 3d. Dwarf Double, 3 ft. Per pkt. 3d.

848

Sphenogyne, h.a. Speciosa, bright orange flowers like a Paris Daisy, with black ring round the centre; very showy. Per pkt.

Statice, see Everlastings, page 55.

SWEET ROCKET, h.p.

Free-flowering plants for early Spring.

Very beautiful, 1½ft. Per pkt. 3d. Rosy white, 1½ft. Per pkt. 3d. Purple.

White.

SWEET SULTAN, h.a.

Sweet scented flowers, useful for cutting; fine bor-Purple. der plants; a little old mortar added to the soil 852 White.

SWEET VIOLET, see Viola odorata.

will help them greatly; 2 ft. Each per pkt, 3d.

Yellow.

# CLIBRANS'

# Large-flowered SWEETPEAS.

"The Sweet Pea has a keel that was meant to seek all shores; it has wings that were meant to fly across all continents; it has a standard which is friendly to all nations; and its fragrance is a sweet prophecy of welcome everywhere, which has been abundantly fulfilled."—The Rev. W. T. Hutchins, of Mass., U.S.A., at the Sweet Pea Bi-centenary Celebration.

The wonderful popularity of the Sweet Pea both in this country and in America seems ever on the increase, and brings with it an equally increasing number of new varieties from both sides of the Atlantic. Many of these varieties, however, vary so little that a process of selection is necessary, and the following list, whilst it might be almost indefinitely extended, will yet be found to contain all that is best and most distinct in the various colours.

## FOUR SUPERB NOVELTIES FOR 1907.

(See Coloured Plate.)

These four splendid Novelties are all developments of the well-known "Gladys Unwin"; they are all as large as the parent variety and have the same characteristically waved crimpled standard which so much enhances the graceful beauty of the flower. The flowers are borne on long stems, and fully 70 per cent. produce 4 blooms to a stem.

E. J. CASTLE.—A beautiful rich carmine rose, shading to salmon in the bold wavy standard. Per pkt., 1/-

FRANK DOLBY.—A lovely pale blue, similar in shade to "Lady Grizel Hamilton" but much finer. Per pkt., 1/-

MRS. ALFRED WATKINS.—A superb shade of soft pink not unlike the old "Princess Beatrice" in colour, but far superior in size. Its beautiful wavy standard and large flower will commend it as an ideal variety for cut blooms. Per pkt., 1/-

NORA UNWIN.—This variety easily takes its place as the finest of all pure whites. It is larger, purer, and of finer form than "Dorothy Eckford," and has the wavy standard of the "Gladys Unwin" type in a marked degree. Per pkt., 1/-

# CLIBRANS' COLLECTIONS

FOR

# Exhibition and Decorative Purposes.

OUR SUPERB 1907 COLLECTION OF 20 VARIETIES for 10/-

# EVERLASTING FLOWERS

### For Winter Bouquets.

The peculiar value of Everlasting Flowers is the permanent character of their form and colour when carefully dried. They should be cut as they come into bloom, and before the flowers are fully developed, and hung up in small bunches in some dry dark place, heads downwards, that the stems may dry straight. Most of the grasses can be dried in the same manner, and by the aid of dyes made to assume charming colours.

Gnaphallum leontopodium, the pretty Alpine Edelweiss so eagerly sought after by travellers Gomphrena globosa (Globe Amaranth), pretty Ever-1097 lastings, with globular heads of various colours ... .3 1008 Helichrysum bracteatum, single yellow annual - album, resembling preceding, flowers white 1000 monstrosum album fl. pl., double white flowers 1100 — luteum fi. pl., double yellow flowers ...

# ORNAMENTAL GRASSES.

The following collection comprises the most attractive, curious, and graceful of these interesting plants, which are alike worthy of extensive cultivation on account of their effective character in the flower garden, or when cut and dried for Winter and Autumn decoration. Most of the varieties may be sown in the open border during April or May, and must be carefully thinned out as early as they can be handled, allowing sufficient space for the plants to develop their true character. Nothing is more suitable than a pretty grass for mixing with cut flowers; there is more grace about them than most things commonly used as foliage. For mixing with Sweet Peas the grasses are eminently suitable.

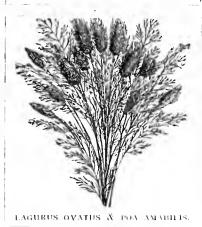

Speciality

CLIBRANS' GIANT MAIZE.—This is a magnificent tall-growing variety, selected by us on account of its robust constitution, which enables it to grow successfully in our Northern Counties. Almost all the varieties of Maize are rather tender, and do not attain maturity in our temperate climate; but this variety thrives admirably and ripens its cobs to perfection, more especially in a favourable season. The plant has an imposing tropical appearance, and grows to a height of from 8 to 10 feet, and produces an abundance of large cobs.

Apart from its great beauty, it will be appreciated by us on account of its robust constitution, which enables it to grow successfully in our Northern Counties. Almost all the varieties of Maize are rather tender, and do not attain maturity in our temperate climate; but this variety thrives are plant has an imposing tropical appearance, and by those who are fond of green corn to eat. Per pkt. 3d. and 6d.

Nicotiana (Tobacco) Ornamental Grasses Perilla Pyrethrum (Golden Feather) Ricinus (Castor Oil Plant) Zea japonica variegata (Maize)

booked upon as an "eyesore," and in which nothing seems to grow. By purchasing an onnce or two of this mixture the garden can be made beautiful in every nook and corner; in

fact, no blank, dreary places may be left as tormerly.

For a Summer and Autumn display sow the seed in March, April, and May thinly in isolated patches, covering with a little soil, then fread or roll the ground.

Per Ounce 6d.; Per Lb., 5s.

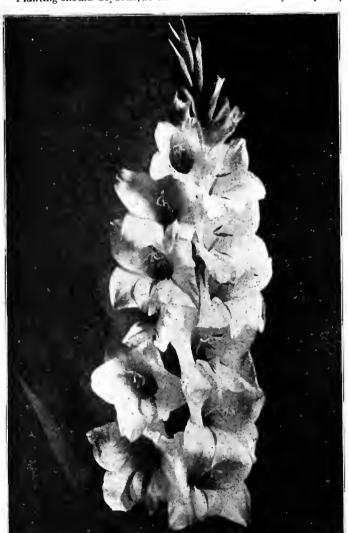

WILD FLOWER GARDEN.

### Gladioli. Popular

AUTUMN FLOWERING GLADIOLI.—This tine class of plants is very popular, the flowers being richly coloured and extremely beautiful. They are perfectly hardy, and succeed in almost any ordinary garden soil, but give the best results if planted in a sunny position in a rich well-manured soil. The beds should be prepared in the Autumn, digging in deeply plenty of well-rotted manure. Planting should be done; at the end of March or early in April, placing the bulbs 4 inches below the surface, and 9 to 12 inches apart, the rows being 1 to 1½ feet from each other. When they are in full growth give plenty of water and occasional applications of liquid manure. Lift in Autumn when the leaves are beginning to die down, and store the bulbs away in a dry place until planting time. Gladioli

and store the bulbs away in a dry place until planting time. Gladioli are grand for cutting purposes, and the spikes keep fresh in water for a considerable time.

For Cultural directions of Early-flowering Giadioii, see below.

### THE BRIDE (Colvilli Alba).

A valuable early pure white variety, unequalled for forcing and cutting, forms most useful clumps in the herbaceous border. 1,000. 35/-; per 100, 4/-; per doz., 9d.

### BRENCHLEYENSIS.

Flowers brilliant scarlet; hardiest of all; splendid for borders. Extra Selected Bulbs, per 1,000, 70/-; per 100, 7/6; per doz., 1/3.

Usual sized bulbs, per 1,000 60/-; per 100, 6/6; per doz., 1/-

### CHOICE SEEDLINGS (Hybrids of Gandavensis).

Strong flowering bulbs, from a splendid strain, in great variety of colour. Per 100, 12/- and 15/-; per doz., 2/- and 2/6.

### GANDAVENSIS (Named Hybrids).

See following Page.

### LEMOINE'S HARDY HYBRID SPOTTED.

These are earlier than the Gandavensis section, and much hardier. Though their bulbs need not be lifted in winter it is better to do so if there be wireworm in the garden. The colours are rich and exceedingly varied, and the large blotches on the lower petals suggest their characteristic name of Butterfly Gladioli. They come into bloom between the Early-flowering and the Gandavensis section.

Finest mixture of the above, per 100, 7/6; per doz., 1 3

### NANCEIANUS (New Hybrids).

A superb new race of Giadioli of the Gandavensis class, of very vigorous growth and enormous well-expanded flowers, with a most varied range of colours

Finest Mixed Hybrids.—Per 100, 10/6; per doz., 1/9.

### SNOW WHITE.

Said to be the best white Gladiolus for forcing or out-door culture. Flowers well formed, of exceptional substance, lasting a remarkable length of time when cut. Every flower on the spike can be used individually for cut-flower work. If the spikes are cut when the first two or four lower flowers open, and are allowed to develop in water, it is positively snow white. Each, 1/-; per doz., 10/-

#### CHILDSI.

A new series of considerable merit. The flowers are of great substance and gigantic size, frequently 6 to 7 inches across, while every known colour among Gladioli is represented. Finest Mixed Hybrids, per 100, 9/-; per doz., 1/6; 2d. each.

#### EARLY FLOWERING VARIETIES. These Bloom from June to August.

Specially adapted for pot culture, as well as for general effect in the open borders, their bright and rich colourings making them very effective in the flower garden, or when cut for decorative purposes. Coivilli alba (The Bride) is a beautiful variety, and the best for forcing and cutting. For out-door culture plant the bulbs from October to December in a sunny position, mixing plenty of well-rotted manure For culture of Autumn-flowering Gladioli, see above.

"Kon-I-Noor." NEW IMPERIAL MONTBRETIA (Copyright.)

## New Imperial Montbretia, "KOH-I-NOOR"

The flowers of this splendid novelty are unusually large and strikingly attractive, of rich pure orange on bright apricot base, a glorious flower of most perfect shape, and opening quite flat immediately, and on strong and crect stems. A strong and robust plant of great vigour unexcelled by any variety in cultivation. The petals of the flowers are broad and well shaped, the many side branches on the plant causes the number of flowers to be at least three times as many as of any of the old sorts, and it is therefore going to be the best paying market flower of any of the Montbretias. Price 6/- per doz. 8d each.

### RANUNCULUS.

For its successful culture it should have a deep moist cool soil, enriched with well-decayed manure. It should be planted as soon after the beginning of February as practicable, in rows six or eight inches apart, two or three inches deep, and two inches between the tubersplacing the claws downwards. Per 100. Per doz. c (1

# **CLIBRANS** GARDEN MANURES.

### CLIBRANS' NITROGEN, PHOSPHATE, AND POTASH MANURES.

RATIONAL MANURING POSSIBLE AT LAST FOR EVERY GARDEN CROP. RATIONAL MANURING POSSIBLE AT LAST FOR EVERY GARDEN CROP.

Of the various substances taken up by the roots of an ordinary healthy plant, three are of prime importance. These three are spoken of as nitrogen, phosphate, and potash, and their importance to the gardener is due partly to the fact that nearly all soils are deficient in one or more of these plant foods, and partly because different kinds of plants vary greatly in their demands on these different food ingredients. Potatoes and Peas, for instance, are so partial to potash that they may be described as potash lovers; similarly Turnips and Beet may be regarded as phosphate lovers, and Cabbages, Vegetable Marrow, and Cetery as nitrogen lovers. It is obvious, therefore, that no one manure, however carefully blended, can perfectly supply the needs of plants with such diverse requirements. For this reason we offer separately the three essential ingredients of all general manures, so as to enable the gardener to apply manures on rational principles, and in accordance with the requirements of each individual crop. All three manures have been most carefully blended so as to give a continuous soluble supply to the plant throughout the whole growing season. The phosphate manure occupies a unique position in so far as it is the only phosphate manure in general commerce capable of acting equally well ou all classes of seil.

### CLIBRANS' "IDEAL" FERTILIZER. THE PERFECTION OF MANURES.

Invaluable for all kinds of Plants, Flowers, Vines, Roses, Fruits, Vegetables, and all Garden Crops. ECONOMICAL. EFFECTUAL. SAFE.

FREE FROM SMELL AND ALL INFURIOUS AND USELESS INGREDIENTS.

This manure is prepared from highly concentrated fertilizing materials only, and whilst containing all the substances necessary for perfect plant sustenance, is particularly free from useless, impure, and injurious ingredients, and leaves behind no deleterious residue. Many prominent Horticulturists and Exhibitors have, during the past few years, used our "Ideal" Fertilizer, and by its aid won numerous prizes at the leading shows.

PRICES:—Tins, 6d. & 1/-; Post Free, 10d. & 1/5. Bags, 7 lbs. 1/9; 14 lbs. 3/-; 28 lbs. 5/-; 56 lbs. 9/6; per cwt. 18/-;  $\frac{1}{2}$ -cwt. and upwards Carriage Paid.

### CLIBRANS' BLOOD MANURE.

As a nitrogenous manure this is unequalled. It may equally well be mixed with the soil when preparing the compost as a top dressing, to be used as a liquid manure at the rate of ½-oz. to 1-oz. to the gallon. Place in the water the day before using, and mix well when applying. Blood manure is not immediately soluble, but after being in contact with the soil for some time decomposition sets up, and it dissolves gradually. It is invaluable for all fruit and flowers, and particularly for promoting the growth of Vines, Roses, and Strawberries in pots.

PRICES:—In Packets 6d. & 1/-; Post Free, 10d. and 1/5. 7 lbs. 2/6; 14 lbs. 4/6; 28 lbs. 7/-; 56 lbs. 9/-; per cwt. 18/-; ½-cwt. and upwards Carriage Paid.

#### CLIBRANS' BONE MEAL.

The quality of our Bone Meal cannot be excelled by any firm in the Kingdom. Being sun-dried, it is absolutely pure and free from sulphuric or other acid and impurities. We supply the Bone Meal in two grades—the Superfine and the Ordinary; the latter is somewhat coarser, and therefore slightly slower in its action.

PRICES:—SUPERFINE, OR ORDINARY GRADES, per lb. 2d.; 14 lbs. 2/-; per \frac{1}{2}-cwt, 8/-; cwt. 14/-; ½-cwt. and upwards Carriage Paid.

#### BONES—HALF-INCH.

These are of precisely similar quality to our Bone Meal, but of course dissolve less readily in the soil and last longer, and are generally used for vine and other fruit-tree borders, orchards, &c.

PRICES:—Per  $\frac{1}{2}$  cwt. 7/-; cwt. 12/\*;  $\frac{1}{2}$  cwt. and upwards Carriage Paid.

### CLIBRANS' LAWN MANURE.

INVALUABLE FOR CRICKET, TENNIS, CROQUET, AND OTHER LAWNS.

Our Lawn Manure has, like our "Ideal" Fertilizer, met with universal approval and commendation. It is carefully prepared from high-class fertilizing materials only, being specially adapted for the encouragement of the growth of the finer grasses, ultimately eliminating the coarser kinds, as well as docks, weeds, &c.

PRICES:—In Bags per  $\frac{1}{2}$  cwt. 6/-; cwt. 11/6;  $\frac{1}{2}$ -cwt. and upwards Carriage Paid.

see page 78.

MANURES-continued.

### **VARIOUS** MANURES.

Basic Slag, 14 lbs., 1/-; per cwt., 6/-Beeson's, in boxes, 1/ and 2/6; bags, 56 lbs., 8/-; per g cwt., 15/-Canary Guano, in tins, 6d. and 1/-; bags, 14 lbs., 4/6; 28 lbs., 7/6; 56 lbs., 12/6; per cwt., 20/Crushed Oyster Shells, for Chrysanthemums, &c., 7/6 per cwt. The Apsley Bamboo Broom, for Lawns, Golf Conrses and general gar-den use, a great im prove-ment on the old Birch Broom, price 2/- each. OFFERED FREE ON

FLOWER POTS, PANS, SAUCERS, &c., when forwarded by rail are at purchasers' risk and we take no responsibility should breakage occur. In all cases where orders are sent it must be clearly understood they are only accepted on this condition, and that purchasers must apply to carriers for compensation.

The mercury or spirit in the tubes of thermometers is liable to get out of order in transit owing to the shaking they receive. We exercise the greatest care in packing, but cannot guarantee the safe arrival of these delicate instruments, nor be responsible for them after despatch. When received with the spirit of mercury detached, a sudden jerk downwards will frequently cause the separated fluid to unite, when the instrument will be found to register correctly.

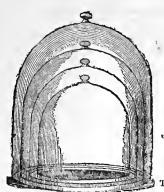

## CLIBRANS, Seed Merchants and Nurserymen,

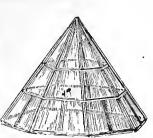

Bell Glasses, Zinc Frames, and Hand Lights are offered free on rails here, and when sent by such are at purchaser's risk; we exercise the greatest care in packing, but take no responsibility, and should breakages occur, purchasers must apply to carriers for compensation.

# CAMPBELL'S PATENT SULPHUR VAPORISER

A patent method of and apparatus for safely vaporising sulphur in Greenhouses to destroy and hold in check Mildews, Rusts, Spots and other Fungoid Diseases and Red Spider infecting Vines, Peaches, Strawberries, Roses, Carnations, Chrysanthemums, Tomatoes, Cucumbers, &c., its introduction has been a great success, complete cures having been effected even in cases where, owing to the particular virulence of some disease, as for instance, Shot Hole Fungus, Rose and Vine Mildew, Cucumber Gumming Disease,&c., it had become practically an impossibility to grow the Host Plants.

Hundreds of Testimonials have been received from all over the world, and it would take many pages of this catalogue to publish the expressed satisfaction of delighted users, perhaps the best testimonial is that the Vaporiser is now firmly established as the standard remedy for the purposes claimed.

Copies of Testimonials will be sent on application.

The apparatus is strongly made and will last a considerable time.

Prices: { No. 1, for houses up to 5,000 cubic feet, 12/No. 2, for houses up to 10,000 cubic feet, 16/-

#### Campbell's acid-free SULPHUR.

With the apparatus this brand of Sulphur should be used.

Per I 4 7 14 21 56 112 lb. lots. Prices: 4d. 1/4 2/4 4/- 7/- 12/- 20/-

# CAMPBELL'S NICOTINE VAPORISING COMPOUND.

Guaranteed to contain 46 per cent. of Pure Nicotine, a higher percentage than that offered by any other manufacturer. For Vaporising in Greenhouses to destroy Green and Black Fly, Thrip, Mealy Bug, &c. It can also be used as a wash or spray when well diluted with water and a little soft soap added.

The prices asked for this compound are perhaps one third less than you have hitherto paid, but this is not in any way due to our offering a less efficient article, the compound cannot be surpassed either for purity or quality, as being large manufacturers of Nicotine we can and do profitably give the highest value obtainable.

#### NOTE OUR PRICES AND GUARANTEED STRENGTH.

# CAMPBELL'S WEED KILLER.

BEST ON THE MARKET. 1 Gallon makes 51 gallons for use.

**PRICES.**— $\frac{1}{2}$  gallon tins, 2/- (tin included); I gallon, 3/6 (drum 9d.); 2 gallons, 6/6 (drum 1/6); 3 gallons, 9/3 (drum 2/-); 5 gallons, 14/- (drum 2/6); 8 gallons, 21/4 (drum 4/6); 10 gallons, 25/6 (drum or cask extra for this and all larger sizes); 16 gallons, 40/-; 18 gallons, 45/-; 20 gallons, 50/;; 40 gallons, 90/-. Carriage paid on 2 gallons and upwards. Drums and Casks allowed for in full when returned within two months, carriage paid.

#### CAMPBELL'S LEMON OIL INSECTICIDE.

An excellent liquid Insecticide; destroys all insects by sponging, dipping, spraying, or syringing, without the slightest danger to the most delicate foliage; also useful as a wash for dogs, hen pens, and such like purposes.

PRICES:—Pint, 1/6; quart, 2/9; ½-gallon, 5/-; gallon, 9/-; or post free, pints 1/10, quarts 3/3.

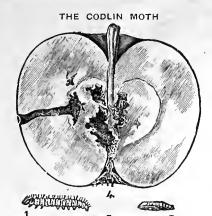

# CAMPBELL'S HELLEBORE POWDER.

PRICES, in Tins.—1 lb., 7d.; 1 lb., 1/-; 3 lb., 2/6; 6 lb., 5/- each.

## CLIBRANS, Seed Merchants and Nurserymen,

1, Caterpillar; 2, Chrysalis; 3, Moth; 4, Section of Apple showing work of Caterpillar.

#### CAMPBELL'S CAUSTIC ALKALI WASH.

The systematic winter washing of all Fruit Trees is now generally conceded to be absolutely essential if good and clean crops are to be obtained. The price of this article is most moderate, and allows of the work being done thoroughly at a minimum cost.

M: George Pyne of Denver Nurseries, Topsham, Devon, writing under date October 2nd, 1906, says:—

"I have found your Caustie Alkali Wash most useful for destroying Moss and Lichens on old Plum Trees; it may be used at 10 lbs., to 100 gallons of water, with splendid results, it destroys all Moss and Lichen, and thoroughly cleans the bark, thus destroying the eggs and Chrysalis of hibernating insects, it may be used with perfect safety as soon as the leaves begin to fall; I have used it as early as Mid-September on Plum Trees, but this would of course be too early for Apples and Pears on which it may be used later, with equally good results.

Sold in Canisters, No. 1, to make 50 gallons strong wash, 8/,, No. 2, ,, 100 ,, ,, 5/6

Rubber Gloves to protect the hands, 7/- per pair.

#### CAMPBELL'S NICOTINE FUMIGATING ROLLS.

No Lamp, Fumigator, or Spirit required; simply light the Roll and hang it up. A very similar article to the Fumigating Insecticide below, but in a more concentrated form, quite as effective as vaporising compounds.

Per Roll, to do 1,000 cubic feet, 6d. each, post free 7d.

#### CAMPBELL'S FUMIGATING INSECTICIDE.

NO LAMP, FUMIGATOR, OIL OR SPIRIT REQUIRED.

SIMPLY LIGHT THE ROLL AND HANG IT UP.

THE CHEAP, SAFE
AND

MOST DEADLY INSECTICIDE.

PRICES.—No. 2 Roll, for 500 feet, 5d. No. 3 Roll, for 1,000 feet, 8d.:: No. 4 Roll, for 2,000 feet, 1/2 each.

#### NICO SOAP.

This consists of pure Soft Soap and Nicotine, one lb., makes 40 to 60 gallons of spraying solution for destroying Green and Black Fly, and Thrip, infesting such outdoor subjects as Apple, Plum, Cherry, Chrysanthemum, Hop, Rose, &c., it is both more economical and effectual than mixtures of Soft Soap with Quassia, Paraffin, &c.

All users of Nico Soap during past season were delighted, but perhaps more particularly those applying it with the aid of a Knapsack Sprayer, as in such cases large batches of Plants and Trees had been thoroughly cleansed at a surprising saving of insecticidal cost and labour.

Prices,  $\frac{1}{2}$  lb. 1 lb. 10 lb Canisters. 1/- 2/- 18/6 each.

# NOTE.—One part makes 600 parts Spraying Solution. CAMPBELL'S BORDEAUX MIXTURE,

For spraying potatoes and other crops, to prevent and cure blight and disease attacks.

Its application to potato crops materially improves quality, and increases the yield of tubers to the extent of one to four tons per acre, and as a No. 3 bag costing 12/6 is sufficient to spray one statute acre twice over, it will readily be seen how profitable the application is. To obtain the maximum value, however, the crop should be sprayed twice at an interval of 4-5 weeks, the first time immediately after plants are first earthed up, and the second after plants have attained full growth; the mixture when sprayed tends to form a glutinous solution adhesive to foliage therefore not easily washed off by rain.

PRICES.

No. 1 Bag making 30 gallons to spray ½ statute acre once over 3/6 | No. 3 Bag making 120 gallons to spray 2 statute acre once over 12/6 | No. 3 Bag making 120 gallons to spray 2 statute acre once over 12/6 | No. 3 Bag making 120 gallons to spray 2 statute acre once over 12/6 | No. 3 Bag making 120 gallons to spray 2 statute acre once over 12/6 | No. 3 Bag making 120 gallons to spray 2 statute acre once over 12/6 | No. 3 Bag making 120 gallons to spray 2 statute acre once over 12/6 | No. 3 Bag making 120 gallons to spray 2 statute acre once over 12/6 | No. 3 Bag making 120 gallons to spray 2 statute acre once over 12/6 | No. 3 Bag making 120 gallons to spray 2 statute acre once over 12/6 | No. 3 Bag making 120 gallons to spray 2 statute acre once over 12/6 | No. 3 Bag making 120 gallons to spray 2 statute acre once over 12/6 | No. 3 Bag making 120 gallons to spray 2 statute acre once over 12/6 | No. 3 Bag making 120 gallons to spray 2 statute acre once over 12/6 | No. 3 Bag making 120 gallons to spray 2 statute acre once over 12/6 | No. 3 Bag making 120 gallons to spray 2 statute acre once over 12/6 | No. 3 Bag making 120 gallons to spray 2 statute acre once over 12/6 | No. 3 Bag making 120 gallons to spray 2 statute acre once over 12/6 | No. 3 Bag making 120 gallons to spray 2 statute acre once over 12/6 | No. 3 Bag making 120 gallons to spray 2 statute acre once over 12/6 | No. 3 Bag making 120 gallons to spray 2 statute acre once over 12/6 | No. 3 Bag making 120 gallons to spray 2 statute acre once over 12/6 | No. 3 Bag making 120 gallons to spray 2 statute acre once over 12/6 | No. 3 Bag making 120 gallons to spray 2 statute acre once over 12/6 | No. 3 Bag making 120 gallons to spray 2 statute acre once over 12/6 | No. 3 Bag making 120 gallons to spray 2 statute acre once over 12/6 | No. 3 Bag making 120 gallons to spray 2 statute acre once over 12/6 | No. 3 Bag making 120 gallons to spray 2 statute acre once over 12/6 | No. 3 Bag making 120 gallons to spray 2 statute acre once over 12/6 | No. 3 Bag

#### CAMPBELL'S VERMOID.

A finely ground and dried powder for incorporating with the soil to destroy Wire, Eel, and other Worms, Bectles, Grubs, Maggots, Slugs, and the many other ground pests which wreak such havor to crops.

PRICES:—10 lbs, 1/6; 112 lbs, 5/6; 1 ton, £5. Canisters and Bags Free.

#### CAMPBELL'S TOBACCO POWDER.

PRICES, in Tins.—12-lb., 6d.; I lb., 1/-; 3 lb., 2/6; 6 lb., 5/- each.

# FARM SEEDS

# Of Tested and Reliable Quality.

Priced Catalogue of Farm Seeds, &c., is published in February, and will be forwarded Post Free.

FREE CARRIAGE.—All orders for Farm Seeds amounting to 20s. and upwards (with the exception of Vetches and Potatoes), are delivered free at any Railway Station in England and Wales.

Clovers.—As no seed varies so much in quality, or requires greater discrimination in buying, than Clover Seed, the greatest care is taken to select clean and genuine samples.

RED, CLIBRAN'S SPECIAL MIXTURE. RED, English, Welsh and Canadian. COWGRASS OR PERENNIAL RED. WHITE OR DUTCH.

WHITE OR DUTCH, GIANT PERENNIAL. ALSIKE. TREFOIL OR YELLOW. MIXED PERENNIAL CLOVERS.

Rye Grass.—Fine samples, thoroughly cleaned by special machinery and free from "Couch" and other deleterious weeds.

PERENNIAL, Ayrshire. PERENNIAL, Pacey's.

PERENNIAL, Devonshire Evergreen. PERENNIAL, Clibran's Extra Heavy. ITALIAN, Home Grown.
ITALIAN, Re-cleaned, Imported.

Natural Grasses.—Carefully cleaned samples of finest quality, separate, or in mixture.

CLOVERS AND GRASSES .- For temporary Pastures or alternate Husbandry.

MIXED CLOVERS AND GRASSES, for one, two, three, or four years' Ley.

Renovating Mixture.—Fine Mixture of Clovers and Grasses for improving old or worn-out Pastures.

PERMANENT PASTURE. - Mixed Clovers and Grasses - with or without Rye Grass, proportioned to suit all soils.

MIXTURE FOR ORCHARDS AND GROUNDS MUCH SHADED BY TREES.—Specially selected.

MIXTURE FOR UPLAND SHEEP-WALKS.—Consisting of varieties which succeed in exposed situations and poor soils.

MIXTURE FOR GAME COVERTS.—Including the stronger growing sorts which afford food and shelter for game.

MIXTURE FOR IRRIGATION OR WATER MEADOW.—Varieties capable of withstanding excessive moisture.

Turnip Seeds.—Our Turnips are saved from the finest picked transplanted Roots, and are the finest Stocks offered.

# To EMPLOYERS requiring HEAD or UNDER GARDENERS, HEAD or ASSISTANT FORESTERS, or BAILIFFS.

shall be pleased to send our List of Names and Addresses of suitable men, with full particulars of wages required, experience, and references. Great care is taken that no man shall be placed on our Register whose character is not good. Our acquaintance with the men's abilities and characters cannot but be of service to all needing men, as the difficulty of selecting from scores of answers to an advertisement, or from applicants of whom nothing whatever is known is felt by every employer of labour; frequently it is noticed that preference is given to an inferior man, and much better men passed over.

# Landscape Work.

We have every facility and are fully prepared to give expert advice, and submit plans, estimates, &c., for all classes of Landscape work. We undertake the formation of new or the remodelling of existing grounds, the formation of Rockeries, Ornamental Lakes, Grottos, Pergolas, Ferneries; the laying out, furnishing, &c., of Winter Gardens, and all other work of allied character.
